## PREFACE.

In offering to the public a work of so novel a character as the present, the author has seized the opportunity of stating the grounds on which it was undertaken.

The importance of the study of the Biblical languages has never been questioned, excepting by those men who are ignorant of them, and are disposed to condemn in toto the utility of that which they have not the means or opportunity to acquire. On the other hand, those illustrious scholars, whose definition of the utilitarian cui bono is directly opposed to the former, have not only inculcated the momentous importance of linguistic study by precept, but have led the van thereof conspicuously by example.

To recount the imperishable names of those who, from the earliest ages of Christianity, have patronised or pursued this study, is unnecessary in this place; their opinions of its importance may be summed up in the words of the learned Dr. Jahn: "occurrit et illud, quod est totius theologiæ fundamentum, neque tamen sine subtili et intimâ linguarum Biblicarum cognitione satis firmari potest, γνησιότης, inquam,

sacrorum librorum, quâ labefactatâ, ruit authoritas horum documentorum, et theologiæ ædificium evertitur." And again, "librorum γνησιότητα et verum sensum, absque subtili et intimâ linguarum scientiâ, comprobare nemo potest."

The phrase "Biblical Languages," although capable of extension to all those versions of the Sacred Scriptures which have been made during the last century into almost every important language and dialect, is usually confined to the following: viz. Hebrew, Chaldee, Syriac, Arabic, Samaritan, Ethiopic, Amharic, and Coptic; to which, of course, the Greek and Latin may be added.

The first four of the languages just enumerated have received especial attention at the hands of scholars; while the four latter have been wholly neglected or forgotten. In fact, during the last few years, so little attention and study have they attracted, that, at the present time, it is impossible to acquire even the rudiments of them, except through the medium of the Latin tongue. Why they have been allowed to fall into such disrepute, it is not worth while to inquire, but we have only to do with the fact that such is the case, and, if possible, to remedy it.

The present work is a Grammar of the Samaritan Language; it is strictly *Rudimentary*, and is intended as a precursor to a more critical and philological view of the tongue. The main object of the author has been to deal with the ordinary facts of Etymology and Syntax, and to produce such a work (to use an illustrious scholar's words), "non ut in ipso hereat juventus, sed ut per eum transeat,

per eum excolatur, et ad altiora præparetur." How far he has succeeded in his endeavours will be for the discerning public to determine, to whose favour he would commend his present attempt.

The author has consulted nearly the whole of the extant writers on the subject,—as Cellarius, Morinus, Castellus, Leusdenius, and others. To the first he is *especially* indebted in the Etymological part of the work; whose facts, notwithstanding they are undigested, and expressed in questionable Latinity, are undoubtedly invaluable.

The Syntax is, however, wholly original; and the author has especially aimed at giving the ordinary rules, to the exclusion of all which might seem hypercritical to the young scholar.

The Work is preceded by a brief dissertation upon the Samaritans, their language and literature, which the author hopes will not be unacceptable to the reader, and is concluded by an extract, from Walton's Polyglot, of three chapters of the Samaritan version of the Pentateuch, with exegetical remarks upon the text, together with a short Lexicon, carefully compiled by actual reading and observation. The student will do well, after he has mastered the Grammar, to construe, by the aid of the Lexicon, and parse the whole of the extracts, in doing which he will find his labours considerably diminished by observing the analogy which the Samaritan bears to the Syriac and Chaldee.

Before concluding, it is scarcely necessary to dwell upon

the extent to which the Samaritan text as edited in the books is vitiated; and no doubt many of the anomalies, which have come to be considered grammatical peculiarities, are to be referred to this cause. The fact is simply mentioned here, to show that the reader must bear with some things, which in the present state of the text are unavoidable.

The author hopes to have an opportunity of editing a critical and philological Grammar, which, with a Lexicon and a revised text of the Samaritan Pentateuch, would form a somewhat complete library of Samaritan literature.

London: 1858.

### INTRODUCTION.

BEFORE entering upon the Grammar, a brief account of the Samaritans, their language and literature, may not be unacceptable to the generality of our readers.

It appears that the ten tribes of Israel who had revolted from Solomon's son, elected Jeroboam as their king, who fixed his capital at Shechem, in mount Ephraim.

The Israelitish king, in order to prevent his people from going to Jerusalem, set up two golden calves, one in Dan, and the other in Bethel, to which they might offer the usual sacrifices.

We pass over the remaining acts of Jeroboam and his successors, until we come to Omri, the sixth king of Israel, who began his reign, A.M. 3079. He it was who purchased the hill of Samaria from Shemer, and built on it a city called by the same name, from which the gentile noun, Samaritans, is derived.

The city Samaria was besieged during Ahab's reign, by the Syrian king, Ben-hadad, but without success: in the reign of Hoshea, however, Shalmaneser, king of Assyria, attacked it, and after three years' siege succeeded in taking it, and carrying away the Israelites captive into Assyria.

The territories of the banished Jews were occupied by a mixed people, brought from different parts of the Assyrian empire,—from Babylon, Cuthah, Ava, Hamath, and Se-

pharvaim. It is to these colonists that the name Samaritans is specially, though not exclusively, applicable. According to Josephus, they were called Cuthæi, as the following extract will show (B.ix.c. 14):—οἱ δὲ μετοικισθέντες εἰς τὴν Σαμάρειαν Χυθαῖοι—ταύτη γὰρ ἐχρῶντο μέχρι δεῦρο τῆ προσηγορία, διὰ τὸ ἐκ τῆς Χουθᾶς καλουμένης χώρας μεταχθῆναι, αὕτη δ' ἐστὶν ἐν τῆ Περσίδι καὶ ποταμὸς τοῦτ' ἔχων ὄνομα, etc.

It appears, moreover, that these colonists were infested with lions, on account of their idolatry; and believing the cause of this visitation to be their ignorance of the worship due to the "God of the land," they resolved to request Shalmaneser to send them a priest or priests of the captive people, who might teach them "the manner of the God of the land." This request was complied with, -a priest was sent. But it does not appear that the instruction he imparted had the effect of totally eradicating idolatry from among them; for we read, that "they feared the Lord, but served their graven images." How long this semi-idolatry continued it is impossible to say: it would appear, however, that on the return from the Babylonish captivity it had ceased; for they not only made an application to Judah and Benjamin to be allowed to participate in rebuilding the temple, for which the latter had obtained a decree, but added, as if reprobating their former wickedness, "we seek your God, as ye do; and we do sacrifice unto him since the days of Esar-haddon, king of Assur, which brought us up here." This proposal was refused by Ezra and Nehemiah, and the other Jews; who were not only empowered by the decree of Cyrus to rebuild their temple, but also to fortify their city. This refusal on the part of the Jews, gave rise to that implacable and deadly hatred which ever after existed between themselves and the Samaritans.

The latter, by their calumnies and intrigues at the court of Persia, at length forced the Jews to desist from their work. We are told that they "hired counsellors against them;" and to judge from the proceedings recorded in Ezra, c. iv., there can be no doubt that the Samaritans were actuated by the most fiendish spleen. They are even said to have gone so far as to attempt to hinder the rebuilding by force, but without success, for the temple was completed.

The Jews never forgave the Samaritans: and as an instance of the contempt and abhorrence in which they held the latter, we may mention the saying, "he who eateth bread of a Cuthæan shall be as one who eateth pork." The Jews even refused to write a copy of the law on a Samaritan parchment.

What their feelings were, therefore, when it was resolved to build a rival temple to their own, may be more easily imagined than described.

Manasses, brother of the high-priest, and son-in-law of Sanballat, the governor of Samaria, was ordered, in common with the other Jews, to give up his "strange wife." He refused, and was consequently compelled to fly for protection to his father-in-law.

On the representation of Sanballat, that the building of a temple in opposition to that of the Jews would tend to weaken the latter,—whom he represented as a nation ever disaffected, and always ready for revolution,—a temple was built by the Samaritans on mount Gerizim, of which Manasses was made high priest.

Shortly after the building of this temple, the Samaritans

revolted from Alexander, who expelled them, and put Macedonians in their place, and gave the province to the Jews. After Alexander's death, Ptolemy Lagus subdued both Judæa and Samaria, and carried away numbers of Jews and Samaritans to Egypt. Samaria afterwards fell into the hands of John Hyrcanus the Jewish chief priest; and soon after him into the hands of the Romans, during whose rule Herod Antipater rebuilt the temple and city with great magnificence, to which he gave the name Sebaste, or Augusta. At the present time, few of this once powerful people exist. Scaliger, who was desirous of being informed of their customs, wrote two letters, one to the Samaritans of Egypt, and the other to the chief priest, who resides at Neapolis, in Syria. Their answers are now in existence, and are well worthy of perusal.

We shall close the preceding brief sketch of the Samaritans, with a short account of their language and Pentateuch; and especially of what is called the Samaritan Version. But as our remarks have been, and must be brief, we may refer those who wish for complete information on the subject, to the Proleg. of Walton's Polyglot, Gesenius "de origine et indole Samaritani Pentateuchi," Cellarius, Schwarzius, Scaliger, Hottinger, and others.

The Samaritan is chiefly a compound of the Hebrew, Chaldee, and Syriac. Among the words derived from these sources, are to be recognised a great number of Cuthæan words, imported, doubtlessly, by the new colonists.

Some of the words borrowed from the former languages have undergone various transformations, as will be seen hereafter, while others have remained entire and unchanged.

The sympathies of the language are decidedly Syro-

Chaldaic, as the reader will observe in the sequel. This is probably to be attributed to the fact, that while the Samaritans sought to fashion their own tongue after the manner of that of the Syrians, who were situated in Decapolis, north of Samaria; they scrupulously eschewed every thing which savoured of their southern neighbours, against whom they appear to have entertained the most implacable hatred.

There does not appear to be any substantial ground for the affirmation of Cellarius, that the Samaritan dialect was ruder and less polished than those of its neighbours. Generally speaking, it is far more simple in its syntax than the Hebrew, and free from those technical constructions with particles, which are especially found in the latter. It does not, however, appear to convey ideas more imperfectly than the Hebrew; on the contrary, there are cases in which its simple diction seems paramount to that of the latter; and to judge of a tongue by the utilitarian principle, that it was made for man, so far the Samaritan successfully attains the end for which language was in part designed. There is one peculiarity in the Samaritan, which especially arrests our attention; and that is, the promiscuous interchange of the so called guttural letters: but whether this is an argument against the άκριβεία of the language, it is not our intention to determine.

It has been previously stated, that besides a large number of words borrowed from the three principal dialects of the Shemitic family, the Samaritan language is found to contain words foreign to all three of them. The historical fact, that the Cuthæi held possession of the Samaritan territories after the Babylonish captivity, or else that the Jews, on their return from Assyria, imported a number of exotic words previously unknown to their own and the cognate dialects,

is not only sufficient to account for the presence of such words, but also gives a clue to fixing the date when the Samaritan dialect was formed. This appears to have been about the seventh century before Christ. Previous to the captivity, there is every reason to believe that the Alphabet now called the Samaritan, was also employed by the Jews in transcribing those copies of the law which were disseminated throughout the tribes of Israel. The Pentateuch, known as the Hebræo-Samaritan, appears to support this supposition; for although written in Samaritan characters, the difference between it and the authorised Hebrew Pentateuch is so small, that there can be no difficulty in pronouncing the former to be a copy of the latter, or rather the latter a copy of the former; for, notwithstanding the ingenuity of Kopp, it is highly probable that on their return the Jews adopted, instead of their ancient characters, the Chaldee, now called the Hebrew, in which the Sacred text, as restored by Ezra, was written. In fact, the coincidence between the Hebrew and Hebreo-Samaritan text is so remarkable, that it induced Morinus to say of the latter, "purum putum Mosis Pentateuchum." The whole question, however, of the priority which ought to be given to one of these two copies of the Law, apparently turns upon the point as to whether the Assyrian characters were known among the Jews previous to the Babylonish captivity,-a question which it is not our purpose to discuss here. The Samaritan Version, which is written in the Samaritan dialect, and of which the following work is a Grammar, claims especial notice in this place.

We have previously spoken of the language in which it was written, whose genius is well set forth in the following

extract from the Atlas Ethnographique of the learned Adrien Balbi:—" Le Samaritain tient de l'Hébreu, du Chaldéen, et du Syriaque; mais diffère cependant d'une manière assez notable de ces idiomes, soit par ses formes grammaticales, soit par des racines qui lui sont propres, soit par des acceptions particulières de celles qui lui sont communes avec les autres dialectes sémitiques."

A few remarks upon the time, and author of this Version, will not be out of place here.

Upon the question of time, many illustrious scholars are at issue. Gesenius, in his learned discourse on the origin and character of the Samaritan Pentateuch, is disposed to place its execution some centuries after Christ. Hottinger and Walton, on the other hand, considered it of the highest antiquity. The illustrious orientalist Gesenius has not favoured us with the grounds upon which he came to the preceding conclusion, whereas the opinion of the two latter scholars appears to be supported by as reasonable hypotheses as the case admits.

In the first place, the internal evidence of the Version is sufficient to show that it is not older than the Babylonish captivity, in fact, that it must have been made after the building of the temple, under the auspices of Sanballat, the governor of Samaria; because the words rendered in our Version (Deut. xxvii. 4) by Mount Ebal, were changed by them into IMAMATANA in Mount Gerizim. This could not have been done till after the building of their temple. The reader who will take the trouble to consult Schwarzius, will find also another reason, which, however hypercritical it may seem, is certainly no less conclusive than the preceding.

Moreover, the analogy which the corresponding Hebrew version bears to the Samaritan will probably enable us to fix more precisely the time when the latter was written.

During the long captivity of the Jews in Babylon, few, if any of them, could have retained their own language free from the contamination of that of their conquerors. Besides, on the termination of that captivity, all the old Jews who had been removed from their country must have been dead: and if we suppose the Assyrian king carried away their infant children, we cannot doubt that few at the restoration, judging from the ordinary length of human life, remained alive to return; and those who did must certainly have spoken the language of their conquerors. Most of the Jews who returned to their country must have been men who had been born in Assyria; so that the Law in the original Hebrew must have been to them pretty much the same as a book written in the standard English of the present day would be to a real Lancashire provincialist. The consequence was, that a paraphrase was made called Targumin, and by this means the Jews were enabled to understand that which, from their ignorance of their vernacular language, must have otherwise remained almost a dead letter.

Judging, therefore, from analogy, it seems reasonable to suppose that the Samaritan version was made for a similar purpose, and about the same time.

That it was made for a public purpose is highly probable from the fact that such works were usually undertaken with that view; and there is no reason to believe that a private individual would undertake and complete such a work for his own amusement, much less that such an attempt would have escaped the ravages of time as the Samaritan has, and have been handed down to our own age. This supposition, together with the fact that the independence of the Samaritans appears to have had no existence after the time of Alexander, would at least be presumptive evidence that it is coeval with the Targumin; because, generally speaking, works for national use are not undertaken when a nation's nationality is destroyed, or its independence lost.

As regards the author of this version, nothing is known; his name has not transpired, like those of Onkelos, Jonathan, and Saad. The way, however, in which he has performed his work, with few solitary exceptions, (and those probably due to the inaccuracy of the *librarii*, who have here, as in other cases, disfigured the original text by innovations, either the result of design or negligence,) will justify the words of Schwarzius: "Cæterum nostro, quisquis demum ille fuerit, interpreti variæ et ingenii et doctrinæ laudes meritò deferuntur."

## SAMARITAN GRAMMAR.

#### CHAPTER I.

1. The Samaritan letters are the same in number as the Hebrew, Chaldee, and Syriac; they have the same power, and the same names. The following Table contains the Alphabets of the four languages:—

Names.	Samaritan.			Hebrew or Chaldee. Syria		Powers.		
Aleph	15	M	×	×	1	vowel a.		
Beth	9	9	2	ב	2	our b or v.		
Gimel	7	7	4	۲	0	g.		
Daleth	7	4		٦	?	d.		
He	¥	£	~	ה	OI	vowel e.		
Vau	7	X		1	0	vowel u or consonant v.		
Zain	19	3	4	7	1	z.		
Cheth	B	H		П	-u	guttural k.		
Teth	♥	6		0	1	t.		
Yod	ut	m	ş	,		vowel $i$ or consonant $j$ .		
Kaph	ಸ	#		٦	2079	a hard $c$ .		
Lamed	2,	2		2	7	<i>l</i> .		
Mem	25	4	3	0	2	m.		
Nun	2	5	5	2	د	n.		
Samech	A	3		D	هـ ا	8.		
Ayin	$\nabla$	Q		¥	2	vowel o.		
Pe	2	$\boldsymbol{z}$	1	5	٩	p  or  f.		
Tsade	ur.	חב		3	3	z.		
Coph	P	Y		5	9	a very hard k.		
Resch	9	9		3	;	r.		
Schin	m	W		200		sch.		
Tau	N	N		ת	1 2	th.		

The Samaritan Alphabet may be written in various ways. The first of the three columns of letters given above contains the Alphabet as edited by Brian Walton in his Polyglot Bible, and Edmund Castel in his Heptaglot Lexicon, and is the mode of writing adopted in this Grammar. The second column contains the Alphabet as adopted by Scaliger, and Leusdenius in his Syriac Grammar. The third column contains the letters which Castel affirms are especially used in MSS.

The Samaritans have no means of distinguishing between the Hebrew letters w and w, both of which may be represented by w. There are only a few purely Hebrew words involving w, in which that letter is represented by w; as, אַלְישׁה for יְשֹׁרֵא, etc.; for in most other words, where analogy requires Sin, they imitate the Syrians, and use &; as, ٩¾٧ for יִשֹר, ٩¾٩ for בשׂר, وעלר, وעלר, وעלר, وעלר, פעלר, פעל

The Samaritans have no *final* or *dilatable* forms, like the Hebrews, for any of the letters, but use the same form under all circumstances.

#### DIVISION OF LETTERS.

2. The letters of the Alphabet are divided into five classes, according to the organs of speech chiefly employed in articulating them; viz., Gutturals VAIA; Labials ANG; Palatals PHMT; Linguals ANGOV; and Dentals MAA. The preceding is the division of Castel. It will be seen hereafter, that the five letters ANMV7 may be advantageously considered as vowels, or matres lectionis.

There is another division of letters into Radicals and Serviles. The Radical letters are those which constitute a root or primitive form. The Serviles such as are added to

the Radicals in derivation, conjugation, declension, and composition.

#### VOWELS.

3. The Samaritans have no points to mark the vowels, like the Hebrews. To remedy this defect, various means have been proposed. Some scholars are of opinion that the Hebreo-Chaldaic method of punctuation ought to be adopted; others the Syriac, among which the learned author of the Heptaglot may be mentioned: he says, "Lingua Syriaca optima est ac certissima regula punctandi tam Chaldaica, quam Samaritana."

Cellarius has taken the mean between these extremes, and, arguing from the fact that the Samaritan is for the most part a compound of Chaldee, Syriac, and Hebrew, he says, "Liberiorem esse Samariticam pronunciationem, et quæ in linguâ illâ sunt purè Ebræa, Ebræo forsitan more efferri posse; quæ Syro-Chaldaica ad Syrorum indolem enunciari debere."

The remark of Hottinger, Anti. Mor. p. 34, that Jac. Golius had been informed by an individual acquainted with the Samaritans at Damascus, that the pronunciation of the latter was rough and inartificial, would, perhaps, justify the belief that such was the case in ancient times. This supposition receives confirmation from the fact that the Syrians and Arabs, who bordered as closely on the Hebrews as the

Samaritans, have never admitted into their languages all those subtle rules of punctuation adopted by the Jews.

The chief vowel or mater lectionis made use of by the Samaritans is A, as is manifest from the frequent occurrence of this letter or its substitutes in Samaritan words. This fact must be carefully borne in mind, because in combinations of letters which cannot be properly pronounced without a vowel, we may suppose this vowel inserted.

The reader who is an advocate of the Masoretic punctuation cannot do better than follow the advice given by Cellarius. There is, however, no necessity for his doing so; for it is not only easy to read the Samaritan without points, but the whole of the Shemitic languages in which they are omitted. The questionable authenticity of those points ought to be a great objection to their use, especially in the Samaritan, where no regular system of punctuation has been adopted.

We may suppose, therefore, the letters  $\mathcal{L}$ ,  $\mathcal{L}$ ,  $\mathcal{L}$ ,  $\mathcal{L}$ ,  $\mathcal{L}$ , which are chiefly called *quiescents*, to be the vowels or matres lectionis which are to be employed in reading the Samaritan language. These letters are equivalent to our five vowels a, e, i, o, u respectively.

There cannot possibly be any objection to extend to the individual letters of the Samaritan exactly the same usage as is observed in our own language; thus, when any letter or consonant, as b, d, g, etc., is pronounced, we are compelled to add a short vowel to it, though that vowel is not expressed; thus, we pronounce the preceding letters be, de, ge, etc., adding the short vowel e to each. In the Sanscrit language the short a or  $\mathfrak{F}$  is usually omitted. Thus where there are two consonants without a vowel, is pro-

nounced kara; hatara, etc. Moreover, in our own language, words with short vowels are usually pronounced so rapidly, that if the consonants were written without the vowels we should have no difficulty in recognising them; as, for instance, who does not immediately recognise the words bkr, mckrl, mrnr, sllr, etc., as baker, mackerel, mariner, seller, etc.? The same might be observed in other languages, where, on the omission of the short vowels, the consonants are sufficient to indicate the word. Vide Coptic Gram.

Judging, therefore, from analogy, it is reasonable to suppose that the short vowels were omitted in Samaritan words, while the long ones were usually expressed by the letters  $A_{\tau}$ ,  $A_{\tau}$ ,  $A_{\tau}$ ,  $A_{\tau}$ ,  $A_{\tau}$ . And in every case where a vowel is required after a letter, we may suppose the *mater lectionis* to be the short  $a_{\tau}$  of the Sanscrit, and supply it accordingly.

We shall subjoin a specimen from Gen. i. 1, 2, of the manner in which the language may be read; presuming, of course, the student is aware that, in common with all the Shemitic languages (with the exception of the Abyssinian branch), the Samaritan is read from right to left.

Samaritan. オロコマル・ハロ・オヨンケ・メン2マ・オハスケンワー Pronunciation. shumië ith Aleë tlämäs B'kămauthe Samaritan. アクロルにはでは、アクロルにはでは、アクロルにはでは、アクロルにはでは、アクロルにはでは、アクロルにはできます。

The short vowels are marked; the others may be pronounced long and distinctly. The student will find no difficulty in reading, by adopting this course: we would, however, remind him of the pithy remark of Cellarius, "Linguas hasce addiscimus non tam colloquendi causâ, quàm intelligendi scripta monumenta Orientalium Populorum."

4. The Samaritans distinguish each word by means of a thick point placed after the word; as, 2255 'Am2. At the end of a period they generally use the sign:; sometimes the simple distinctive', at others -:. When the sense is suspended and imperfect, instead of our colon they substitute the sign' placed above the word and after it. Sometimes the single point is used instead of it, and vice versâ.

They have various signs to supply the place of our full stop; as, =-:, <:, =<, -<, or -:. The first is that which is more frequently used.

Sometimes between two verses or lines we find stops compounded of some of the preceding; as, <-:-==-:-<.

It must be observed, however, that these signs apparently depend on the caprice of the writer, and are found differently written in all the copies of the Pentateuch.

The small horizontal line – which is sometimes placed over letters, has various meanings. In the first place, it signifies that an ambiguous word is not to be taken in its usual acceptation; as, we a name, but we Shem, the son of Noah; 2½ God, but 2½ the preposition to or at. In the second place, it is a sign of apocope; as, ½ for ¾½ thou. Or else it is a sign of cacography; as, Gen. xxix. 32, 34, ¾ which ought to have been whis name.

The Samaritans do not divide their words at the end of a line; but, if a word be too long, they reserve it for the next line; and, in the mean time, write the last word in such a manner that the two last letters may fall at the end of the line, divided from the rest of the word without any mark; as,

5. Before proceeding further, it is necessary to remark, that there are three parts of speech recognised in the

Grammar, viz. the Noun, Verb, and Particle; in which order they will be considered.

#### CHAPTER II.

#### THE NOUN.

1. The Samaritan nouns, like the Hebrew, may be considered as having their roots in the verb. They are formed in various ways: some consist of radical letters alone; as, where a man, 32% God: others by the insertion of some quiescent letter; as, amam a goat, arma a judge, etc.; or by the addition of a letter or letters to the beginning or end of the root; as, 2255 a word, 3395 a judgment.

Some are derived from imperfect verbs; as, ATMT a stranger, MTLA history, etc.

The quadriliteral nouns are such as are composed of four radical letters. They are usually read with some quiescent; as, 27723 a treaty.

The adjectives are found to vary in their formation, like nouns substantive; as, where holy, as pitiful, selver naked, etc.

In a rudimentary Grammar like the present, a critical discussion of the various senses of the nouns, according to the species of the verb from which they are derived, would be out of place. The Lexicon will supply their senses, which will be sufficient for all practical purposes.

In the Samaritan, as well as in the other Shemitic or Syro-Arabian languages, there are only two genders, Masculine and Feminine. The Feminine supplies the place of a Neuter gender.

Nouns of the Masculine gender are usually known by their termination or signification. By the former, when they end in a radical letter, or servile other than  $\Im$  or  $\Lambda^*$ ; as, where  $\alpha$  man, many an Hebrew; by the latter, when the subject of the noun is masculine; as,  $\Im 2 \Lambda$  God.

The nouns expressing districts and cities are generally feminine. Sometimes under one termination both genders are included. This is especially the case with the names of animals, as in the Hebrew.

Some nouns, though terminating in an essential masculine characteristic, are, however, feminine; as, Lev. v. 1, \*\TX\* '\S\TX\* \S\TX\* and when a soul sins. So \S\T\* the earth, \TM\T an eye. As no fixed rules can be given for determining the genders, they can only be acquired by reading and observation.

There are two Numbers,—the Singular and Plural. It is scarcely necessary to recognise a Dual number, since, in consequence of the absence of diacritical points in the Samaritan, there are no means of distinguishing it from the plural.

Cellarius apparently inclines to the opinion, that the dual number, if it occur at all, is not supported by sufficiently conclusive examples to justify us in attempting to establish it as one of the essential numbers of the Samaritan language.

<sup>\*</sup> Nouns in 7 and M, apocopated for 3N7 and 3NM (§ 5, 9) are however feminine.

Morinus, however, is of opinion, that A inserted before the termination is probably characteristic of the dual; thus, ଅጠሉ ኃዓሌ Gen. xxvii. 36. Many exceptions may be taken to the use of this letter as an essential mark of the dual number, and none stronger than that of work in Exod. xvi. 29, where it is absolutely necessary that the Hebrew dual יוֹמִים should be emphatically marked, so as to prevent the possibility of confounding it with the plural,—such, however, is not the case. The terminal 34, which is supported by Castel, does not depend upon sufficiently conclusive examples to justify its adoption as a mark of this number. All the pertinent examples produced of it by the learned author of the Heptaglot are accompanied by numerals, which, in the absence of a characteristic termination of the noun, supply the place of the dual number. The termination is evidently plural. The same remarks apply to the form 31/4 in Gen. xxxiii. 1, which is accompanied by the numeral; as, 31/1 mm · mrgr two handmaids.

The existence of a dual in the Hebrew language, essentially different from the plural, is entirely due to the Masoretic points. In such cases as the one given above from Exod. xvi. 29, where there is an apparent necessity for distinguishing the numbers, it is doubtful whether this distinction is not as clearly pointed out by the context, independent of the diacritical distinction, as it would be by the addition of a numeral which removes all ambiguity. And in the case just mentioned this numeral is actually expressed in the Syriac; as,

#### STATES OF NOUNS.

2. The Samaritans, like the Syro-Chaldees, have three

states or forms of nouns, viz., the absolute, emphatic, and constructive. In each of these states we have to consider the formation of gender and number.

#### ABSOLUTE STATE.

- 3. Singular Masculine.—Every noun which is used simply or absolutely, or which does not govern another usually expressed by our genitive, is said to be in the absolute state; as, 323 a king, 997 a master, etc.
- 4. Plural Masculine.—The affinity which the Samaritan bears to the Chaldæo-Syriac, might lead us to expect that the plural termination am of the latter would be far more used than the Hebrew am. Such, however, is not the case, as the more usual form is am; thus, amaim days, amaim judges, etc. Cellarius rightly affirms that the vast majority of nouns are thus formed.

The Syro-Chaldaic form will also be found, though, comparatively speaking, rarely; as, מותליות sons, ישוליות eyes, etc.

Nouns ending in m omit one of the consecutive yods, which concur in affixing the plural terminal; as, Exod. xxxiv. 24, which concur in affixing the plural terminal; as, Exod. xxxiv. 24, which concur in affixing the plural terminal; as, Exod. xxxiv. 24, which concur is affixed to the consecutive yods, which concurs in affixing the plural terminal; as, Exod. xxxiv. 24, which concurs in affixing the plural terminal; as, Exod. xxxiv. 24, which concurs in affixing the plural terminal; as, Exod. xxxiv. 24, which concurs in affixing the plural terminal; as, Exod. xxxiv. 24, which concurs in affixing the plural terminal; as, Exod. xxxiv. 24, which concurs in affixing the plural terminal; as, Exod. xxxiv. 24, which concurs in affixing the plural terminal; as, Exod. xxxiv. 24, which concurs in affixing the plural terminal; as, Exod. xxxiv. 24, which concurs in affixing the plural terminal; as, Exod. xxxiv. 24, which concurs in affixing the plural terminal is a second to the concurs in affixing the plural terminal is a second to the concurs in affixing the plural terminal is a second to the concurs in affixing the plural terminal is a second to the concurs in affixing the plural terminal is a second to the concurs in a second terminal is a second to the concurs in a second terminal is a second terminal in a second terminal is a second terminal in a second terminal in a second terminal is a second terminal in a second termina

Some masculine nouns form their plural like those of the feminine gender; as, 439% fathers, 4324 names.

The two nouns, which life, which a countenance, have no singular number: this is also the case with some others.

The Hebrew ecthlipsis of m in the formation of the plural number is also to be remarked; thus, wmma houses, from mma in the singular number, the Hebrew plural being in the singular number.

5. Feminine Singular.—The feminine singular of this state

As regards the termination  $\Lambda$ , Cellarius doubts whether it is *legitimately* employed here in expressing the feminine; he refers all nouns in  $\Lambda$ 7 and  $\Lambda$ 11 to the *constructive* rather than to the *absolute* state.

Characteristic of this gender also are 7 and m; as, Exod. xx. 16, 79v & testimony; Deut. x. 18, m&sh a garment.

The adjectives in this state have no other mark for the feminine than  $\exists$ ; as,  $\exists m \lor v$  living, masc.,  $\exists m \lor m \lor v$ , fem.;  $m \lor m \uplus Egyptian$ , masc.,  $\exists m \lor m \uplus$ , fem. This is the case also with all names of people and races.

6. Feminine Plural.—The feminine plural is formed by the suffix 3, the Chaldee 1, as, 352 complete, 359 blessings, 3999 great, etc.: 5 may also be preceded by A; as, 54mgy cities, 34793 hine, from may, 793 respectively.

The feminine nouns שלחש years, שנחש words, שלחש years, בנחש words, stones, etc., follow the masculine gender in the plural number. So with שייים women, which has no singular number.

#### EMPHATIC STATE.

7. Masculine Singular.—When a noun is to be expressed emphatically, this is done by affixing & to the noun, which is then said to be in the emphatic state; as, & & & God. & WYAF the man, & WY the people, etc. Sometimes the Hebrew prefix & is employed, especially with pronouns and participles, as will be seen in the Chapter on the Particles. Such cases are, however, rare, and foreign to the genius of a language, which from its Syro-Chaldaic sympathies, denoted the emphatic state by a suffix, not a prefix.

Nouns ending in m/s on assuming the suffix a drop the penult. m; as, a/sab the Hebrew, for am/sab. Similarly, a/sam2/s third, a/sam3/s fourth, from m/sam2/s and m/sam3/s respectively, etc.

8. Masculine Plural.—Like the Chaldee, the absolute terminal wm becomes am; as, amma houses, for wmma, etc.

Nouns in m of the absol. sing., instead of am in the plural emphat., adopt ams; as, amses boys, from amses, etc.

The names of races and patronymics end in MA, as in absol. sing.; thus, MAZ Levites, MAZVII Canaanites, etc.

Nouns only found in the plural are regularly inflected; as, ammy life, from wmmy; amwy the heavens, from wmwy, etc.

Similarly amus women (fem.), is derived from the absolute which or smus.

9. Feminine Singular.—The feminine singular of this state is formed by changing the absolute terminal \( \) into \( \) \

Nouns ending in 7 and m add AA; as, AATDRAA from TDRAA; AAMZD from MZD, etc. Cellarius considers the emphatic forms of such words as having been once the absolute, whence by apocope those in 7 and m arose.

Some nouns are feminine in gender, but masculine in the termination of their absolute state; as, with the soul, The a hand, etc. Such words form their emphatic state like nouns masculine; as, xwii, xyi; similarly xvii the land. The use of the letter in zirvii. 23, presupposes an absolute form xvii. Vide Chap. IV. § 11.

10. Feminine Plural.—This is more frequently used than the absolute, from which it is formed by changing 2 into

ጃሉ, if ጎ be preceded by ሉ or ጓ, but if not, into ጓሉሉ; as, ጓሉለጠላየ from ጎሉጠላየ, ጓሉሎኋላዓ from ጎኋላዓ; ጓሉጓጠ2ጋ wonders, ጓሉጓኋጓዓ beasts, or with ሉ for ጓ as in Gen. i. 26, Deut. xxxiv. 11. Similarly from ጎጠሉላብ። Egyptians (fem.), we have, dropping ጠ, ጓሉሉላብ።; from ጎጠሉዓባ Hebrews, comes ጓሉጠሉዓባ♡; also without ጠ, Exod. i. 19.

The following masculine nouns are similarly formed, viz., אַאַאָּאָ fathers, אַאַאָּשִׁיי names, אַאַמּאָל fishes, Num. xi. 5, from אַזְלְזְל or מַלְנְיָּאָּ from Chald. אָיִנְיָּאָּ.

#### CONSTRUCTIVE STATE.

11. Masculine Singular.—This is the same as the absolute masculine singular. The nouns 31/4 father, 32/4 brother, assume m in the constructive state like the Hebrew; as, Gen. x. 21, 1/2m · m31/4 · 937 · m93 · 22 · m31/4 · 1/23 He was the father of all the sons of Eber, brother of Japheth.

The noun RA, though often used by the Hebrews, is usually replaced among the Samaritans by MASA Gen. xiv. 12; MMLA xxii. 23.

- 12. Masculine Plural.—The terminal letters of the absolute and emphatic masculine plural, viz. 3, 3, 3 are omitted in the formation of the constructive state; thus, 3m3423 angels in the absolute state, becomes m3423 in the constructive; as, 3m324 m3423 angels of God; make am3 face of the water, etc.
- 13. Feminine Singular.—This is formed from the emphatic state of the same number and gender, by omitting the final letter and retaining the penult. A; as, 'ATMMS awar the wichedness of man; which is arams in the emphatic state; ala 'Aams the word of God; 'Ams avar beast of the earth, from ams, or arms.

14. Feminine Plural.—The constructive feminine plural ends in  $\Lambda$ , the Chaldee  $\Lambda$ . The mater lectionis  $\Lambda$  sometimes precedes this termination; as, Gen. xlix. 26, 'MAST HEART' HEART' HEART' HEART the blessings of thy father and thy mother have prevailed; Gen. vi. 2, AMST the daughters of the man.

The following masculine nouns follow this form; viz. ANDA father, ANDA names, ANDA fishes. Examples are, Num. xxxi. 26, Num. xxxi. 26, Num. xxxi. 26, Num. xxxi. 40, Num. x

These observations will be sufficient to show the modes employed in forming the different states of nouns.

#### CASES.

15. The genitive case is the only one marked by inflection; the others are formed by *prefixing* prepositions to the nouns, sometimes *separable*, sometimes *inseparable*.

The genitive case is not only formed constructively, after the manner explained in § 11–14, but also with the Syriac prefix T; as, Gen. xxii. 18, AVALT. ANV · LH all the people of the earth; Exod. xx. 16, APMT · TTVA false witness; Num. xxi. 9, MYAT · MYA brazen serpent. This case-mark is far more frequently used by the Syrians than the Samaritans.

The dative and ablative cases are formed by inseparable prefixes; as, אַ אַ אַ בּע to thy sons, אַ װּ װּ in my name, etc.; also by separables, as, אַ װּץ ' שֵׁשׁ from the house, ' בַּעוֹר between the people, etc.

The accusative or objective case is formed by prefixing

the separable word Am (the Chaldee n!) to the noun; as, avak Ama amazam Am the heavens and the earth. Sometimes by prefixing wo, which is properly a preposition signifying with like the Hebrew ns; as, Exod. iv. 25, 23va wo Ammve she cut off the foreshin; Exod. xx. 24, mwm wo Aasa I have recorded my name. In all these cases it is probable that the preposition wo has, as far as we are aware, lost its original force and become redundant; though, from the similar instances found in other languages, this construction would seem to have originally arisen from phrases in which the force of the preposition was emphatically marked. The same remarks apply to we in Exod. xxxii. 35, where we find and wo with the plagued the people.

As in other languages, in the absence of a particle, the active verb is a sign of the accusative case.

The vocative case is the same as the nominative.

#### COMPARISON OF ADJECTIVES.

16. There are three degrees of comparison: the positive, comparative, and superlative; each of which is defined as in other languages.

Of the positive degree nothing need be said.

The comparative is formed by 53, a preposition conveying an idea of superiority; as,  $3\sqrt{4}$  37,  $3\sqrt{4}$  37,  $3\sqrt{4}$  37, and  $3\sqrt{4}$  more than the people of the land, Exod. v.5;  $3\sqrt{4}$  37,  $3\sqrt{4}$  more righteous than I, Gen. xxxviii. 26.

The superlative is formed by an adverb; as, Gen. i. 31, amaw · av very good: or by doubling the positive; as, amaw · amawa very greatly, Gen. xvii. 2.

#### NUMERALS.

17. The numeral nouns are divided into two classes, Cardinal and Ordinal; as their construction is sufficiently explained in the Syntax on Adjectives, it will be sufficient in this place to give tables of both classes.

The following is a Table of the Cardinals:-

	Masc.	Fem.	
One	ALK	AV.B.	
Two	APME A	ላዮላጠረ	
Three	NZN	₹ <b>/</b> 2/	
Four	<b>₹</b>	₹PEV¥	
Five	mms	3mmB	
Six	Nu	A/m and	Mym
Seven	<b>v</b> 9₩	\$∆Jm	
Eight	ンゴマ	まなにな	
Nine	$\nabla^{\mathbf{m}} \mathcal{N}$	\$∆mV.	
Ten	97	3942∇	
	Twenty	mud4d	
Thirty Forty Fifty Sixty Seventy Eighty Ninety Hundred		mmx2x	
		*APEVILLE	
		mumma A	
		Mum	
		™EDWE	
		く引がと引	
		Amdmr.	
		<b>ጎሉ</b> ኛ፟፟	
Thousand		2214	

In the formation of the numerals between ten and a hundred, the less is commonly put before the greater; as,

ዓሷ⊽ ነ ጓግዝ eleven, ሤጠጏሤሉ ' ሉጊሉ eighty-three, etc. This rule is, however, relaxed in the case of numbers exceeding a hundred; as, ጓሉພ ' ሤጠኅሷ∇ፕ ' ጓሉሤ ' ዓዓ ' ጓਘሤፕ but Moses was a son of one hundred and twenty years, Deut. xxxiv. 7.

In the Samaritan language, as in the other oriental tongues, the *ordinal* numbers do not exceed ten: beyond that, their place is supplied by the cardinal; as, Num. xxxiii. 38, \(\mathbb{Mm}\nabla\beta\left\lambda\left\lam

The Ordinals are:-

First	pr or Apr	Sixth	MAMA E
Second	<b>小ど</b> でを	Seventh	MEMDE
Third	3/m2/	Eighth	くればれば
Fourth	PEMDE	Ninth	VmWAE
Fifth	REMER	Tenth	<b>∆</b> Fmee

The forms MARTY and MARY are also read for TRA.

These numerals are sometimes found to end in RA instead of R, a termination which may be compared with the Chaldee R.

The distributive numerals are expressed by repeating the cardinals; as, שמתיא ישמיא two by two, etc.

For further information upon this subject, the student is referred to the Syntax.

# CHAPTER III.

#### THE VERB.

- 1. The second part of speech is the verb, which we now proceed to consider; and, in so doing, two things claim especial attention:—First, the *species* of the verb, by which are meant its various forms and conjugations:—Secondly, the mode of inflecting each *species* or *form* through its moods, tenses, and persons.
- 2. The *primitive species* consists of radical letters alone (generally three in number), as in the Hebrew.
- 3. The *derivative species* are formed from the *primitive* by the addition of servile letters, which mark the peculiar characteristics of each.
- 4. Edmund Castel, in his Heptaglot Lexicon, recognises in the Samaritan as many different species of the verb, or as many forms as are found among the Syrians and Chaldees; that is, six,—three active and three passive: the active are respectively called Pehal, Pahel, and Aphel; and the corresponding passives, Ethpehel, Ethpahal, and Ettaphal. The primitive species is Pehal; all the rest are derivative. Morinus, however, is of opinion that, in consequence of the absence of diacritical points in the Samaritan dialect, there are only three distinct conjugations, viz. Pehal, Aphel, and Ethpehel or Ethpahal.

The difference of opinion which exists between Castel and Morinus, as to the number of conjugations may be reconciled by regarding the two conjugations Pehal and Pahel of the former, which appear to differ but slightly in form, as one and the same *species*; and the three passive *forms*, whose individuality cannot be easily discerned, as in reality but one form; we have then only three conjugations.

Castel's division is, however, not only supported by Syro-Chaldean usage, but in the Samaritan language itself there is, doubtlessly, evidence to show that Pehal and Pahel are not only distinct in signification but also frequently in form. This is especially the case in the infinitives and participles, as may be inferred from the few examples which Cellarius has given in his Grammar: he quotes TPI of the conjugation Pehal from Exod. xx. 5, which is used in the sense of visiting, whereas TPI of the conjugation Pahel is found in Deut. iv. 2, in the sense of commanding. Compare also INDIE Gen. xii. 3; INDIE Num. xxiii. 10, etc., "quæ frustra ad Pehal reduxeris, partim formatione, partim significatione repugnante."

The individuality of the passive forms cannot be so defended: generally speaking, there is apparently no reason why they should not be considered one and the same, though used in different senses. There can scarcely be any doubt, however, that the Samaritans and the other tribes of the Shemitic family were able to distinguish accurately in pronunciation the different senses of a word consisting of the same combination of letters; or, at least, that the sense could easily be conjectured "ex serie orationis," supposing the pronunciation the same; under these circumstances we shall adopt the division of Castel, and in the first place give the signification of each of these species, upon which their classification must depend in the absence of distinct forms.

5. The first conjugation, or Pehal, the Chaldee Pehal,

and Hebrew Kal, has simply an active transitive or intransitive signification; as, 594 he sold, 259 he ceased.

The second conjugation, or Ethpehel, is the passive of Pehal; and, like the Chaldee Ethpehel and Hebrew Niphal, has, generally speaking, a passive signification; as, 'A2X X2' M27MA' 'ABM because there he was revealed unto him, Gen. xxxv. 7; 'A79' A79MAMT' A739' A79MAM' A2 ye shall not make yourselves unclean with them, that ye be defiled thereby, Lev. xi. 43.

The third conjugation, or Pahel, the Piel of the Hebrews, has various senses. First, when the signification of Pehal is intransitive, this conjugation renders it transitive; thus, ALVA thou shalt return, Gen. iii. 19, of the conjugation Pehal is intransitive, but in Pahel it is transitive; as, BAB: AM: ALVA: ARAV must I certainly bring back thy son, Gen. xxiv. 5. It is causative, Gen. xv. 11, ALV BASA: Araham caused them to go away. Sometimes also it is intensitive

The fourth conjugation, or *Ethpahal*, is the passive of the preceding, and as *Pahel* is frequently causative in an active sense, this is causative in a passive one; as, 72\$VNA were finished, Gen. ii. 1, in the sense of having been caused to be made or finished.

The fifth conjugation, or Aphel, the Hiphil of the Hebrew, is usually the causative of Pehal; as, In the ARART and caused it to be led about, Exod. xiii. 18. It may have the sense of permitting, declaring, exhibiting what is indicated by Pehal: as also a passive sense; thus, In the shall be slain, Num. xviii. 7; IN THE they were anointed, Num. iii. 3, etc.

The sixth conjugation, like the Hebrew Hithpael, is generally reflexive; as, R211 he shall cleanse himself,

ሉዮሚሉጠ he shall purify himself. It is sometimes found actively; as, ፕሮዚህሉሉ they desired, Num. xi. 4.

We have previously stated, § 1, that each species is inflected through moods, tenses, numbers, persons, and genders.

There are three modes, the indicative, imperative, and infinitive. There is no difference between the subjunctive or potential mood and the indicative in *form*; they can only be distinguished by the sense or context.

The indicative is susceptible of a definition similar to that given to it in other languages.

The imperative mood is only used in commanding, exhorting, or imprecating; its place is supplied by the future in forbidding, dissuading, and deprecating.

The infinitive mood expresses an action or passion; sometimes an intransitive notion indefinitely, that is, without restriction to time, person, number, and gender, all of which are regarded in the finite verb. This mood exactly resembles the noun in its use, inasmuch as it is capable of receiving nominal constructions, especially when used with the prefixes 3, 2, 3, 9. Moreover, the sense resulting from combination with these prefixes is such as is usually conveyed, or may be usually conveyed, by verbal nouns, and hence it is that De Sacy, in his Arabic Grammar, prefers to consider infinitives as verbal nouns. For instance, the word my 32 mg, which is when I sent, may also be rendered by a verbal noun on my sending. This is also the case in the Hebrew, which, as well as the Samaritan, approximates to the terse mode of construction followed by the Greeks, who use the article with the infinitive, as, ἐν τῷ πέμπειν. This idiom is further exemplified in the Syntax.

The participle is nothing more than a noun adjective,

carrying with it a notion of action or passion; it is scarcely necessary to remark that the laws for the formation of gender, number, etc., are the same as those for nouns adjective.

There are two *tenses* in the indicative *alone*, the perfect and future. To express our present tense, the same method is adopted as among the Hebrews. Vide Syntax.

The numbers are two, singular and plural.

The *persons* in each number of the perfect and future of the indicative are three; but in the imperative mood there is only one person in each number, viz. the second; the place of the third is supplied by the future tense.

There are two *genders*, masculine and feminine. It will be observed that the first persons in each number are common.

Subjoined is a Paradigm of a regular verb through its different conjugations.

Very rarely occurs, perhaps not at all.

7. Upon the first conjugation, the following observations will be found useful.

The preterite of the indicative of this conjugation is formed like the Syriac, and differs both from the Hebrew and Chaldee. The difference between the Hebrew and Samaritan in the singular is apparent in the third person feminine; the former ending in 7, and the latter in A. In the plural number, the Samaritan and Hebrew differ widely, especially in the first and third person; the difference is not so great between the Samaritan and Chaldee, though remarkable in the first and third person feminine, both of which end in &. Sometimes, however, the servile letter & is adopted, as in the Arabic کتبوا, after the masculine termination 7, as will be seen from the examples ₹1532♥ Gen. xlix. 23, and 315749 Num. xxxii. 39. It must not be forgotten, however, that in most cases of this kind the pronominal suffix a is found; so that A would seem to have been added for the purpose of distinguishing more emphatically between the verbal termination and the suffix.

It will, perhaps, be as well to observe, that the suffix  $\Lambda$  of the first person singular may be considered as attached to the verbal root by the vowel  $\Lambda$ ; for, as Morinus has observed,  $\Lambda$  is sometimes expressed, as in Exod. xxxiv. 18, BLARSYJ I have commanded thee. This expression of  $\Lambda$  may be accounted for on the ground that, as all the characteristic terminations of the persons are derivable from the pronouns expressing those persons respectively, we may suppose the whole of the pronoun of the first person, viz.  $\text{MDLA}^*$ ,

<sup>\*</sup> The inserted letter  $\mathfrak{I}$ , if we suppose it changed into  $\mathcal{N}$ , will give the suffix for forming the first person singular, as  $\mathbb{M}\mathcal{N}\mathcal{N}$ .

added to the root of the verb, without omitting the A. This will lead us also to determine the vowels by which the other suffixes may be supposed attached to the root, as the second person singular, masculine and feminine, and the whole of the plural, whose initial letters being A., we may suppose this to be the mater lectionis by which they are connected with the verbal root.

The first person plural is usually expressed by double 2; still it is to be found with a single 2 in the Pentateuch, as the instance produced by Cellarius, from Num. xxi. 7, will prove, where 2223 we have spoken, is read.

- 8. The future tense of this conjugation is decidedly Chaldaic in its formation; it agrees as closely with the Chaldee as the perfect does with the Syriac, because, though the second person feminine singular is found usually without the paragogic \$\frac{1}{2}\$, it is frequently employed. The last radical of the verb in the future tense is sometimes preceded by \$\frac{1}{2}\$, the Syriac \$\frac{1}{2}\$, and Hebrew \$\frac{1}{2}\$; as, \$2\frac{1}{2}\true{1}\true{1}\$. The termination \$\frac{1}{2}\$ of the second and third person plural is sometimes read \$\frac{1}{2}\$ with the omission of the \$\frac{1}{2}\$; thus, \$\frac{1}{2}\true{1}\true{1}\$ Num. xxxv. 6, \$\frac{1}{2}\true{1}\true{1}\$ Gen. viii. 22. This eethlipsis of Nun no doubt induced Castel and Morinus to consider it as paragogic; the frequent occurrence, however, of this letter, as well as the coincidence of the future generally with the Chaldee, would seem to be a great objection to the opinion entertained by those two scholars.
- 9. In the imperative mood, the Syriac o is very rarely found before the last syllable. It must also be observed, that, in the imperative mood, examples of the plural feminine are very rare. Cellarius gives the following instances:

10. In the paradigm we have given various forms of the infinitive of Pehal, which is sometimes accompanied by the Syriac b, but is more frequently without it; the form with " being chiefly confined to Pahel; in fact, there appears to be no reason why this form should not be exclusively confined to Pahel (except in the case of the infinitive of Aphel, which is generally known by the termination 3/2), especially when we consider that Pehal and Pahel have frequently the same force, like Kal and Piel in the Hebrew. It must be observed that the form with z is seldom used when the infinitive is construed with its verb; as, '23% 23mm, the governing preposition 9 being omitted. The form frequently made use of among the Hebrews in this construction is the infinitive of Kal, which being usually rendered in the Samaritan version by the infinitive without 3, is, to say the least of it, a circumstance which favours the supposition previously made, that the form without the prefix z is exclusively confined to Pehal, while that with " belongs to some of the other conjugations.

In some instances we find  $\overline{\gamma}$  placed before the last radical; as, Num. xxiii. 11,  $3399 \cdot 399 \cdot 399$ 

11. The first conjugation has two participles, called Benoni and Pehil, corresponding to the Chaldee participles of the same name; the former answers in sense to the Latin participle in ens; the latter generally to the perfect participle in tus; thus, MMP2 they who ascend, of ἀναβαίνοντες; MMA9 blessed, ὁ εὐλογημένος.

Cellarius has given numerous instances in which he considers the active participle as having \( \frac{7}{3} \) before the last radical; thus, \( \frac{3}{3} \) he that sheddeth, Gen. ix. 6; \( \frac{3}{3} \) he that possesseth, Gen. xiv. 19; \( 2 \) A \( \frac{7}{3} \) he that revengeth, Num. xxxv. 21. I strongly suspect, however, that these instances, and others which are met with, are nouns substantive, formed by means of the servile letter \( \frac{7}{3} \). Compare \( \frac{7}{3} \) a judge, \( 2 \) \( \frac{7}{3} \) \( \frac{7}{3} \) a murderer, \( \frac{7}{3} \) \( \frac{7}{3} \) and a multitude of others, all of which are nouns. Cellarius states that Pehil has sometimes an active signification; and gives, as an instance of this, \( \frac{1}{3} \) mpm \( \frac{7}{3} \), Gen. xxiv. 13, which he renders "egredientes;" it is manifest, however, from the passage, that it preserves its usual passive sense; the action denoted by it being one which is manifestly more perfect than inchoative.

Pehil is found, in Deut. xxi. 23, with  $\tau$  instead of m; as, 972m he that is hanged. There are cases also in which this participle seems to have the force of the agrist in Greek; as, for instance, 2mvp δ κτανών.

Both participles are sometimes found, like nouns adjective, with  $\Im$  emphatic.

12. Remarks on the second conjugation:—The rules observed in the Hebrew for transposing the *sibilants*, on account of the passive character  $\Lambda$ , are also found in the three passive conjugations of the Samaritan; as, \$\mu\lambda \lambda^{\mu}\mu\lambda shall be shed, Gen. ix. 6; 2\mu\lambda \lambda was beheld, Exod. ii. 12.

Moreover, after this transposition, if the first radical be A, the Tau is changed into T; if it be m, into T; as, PVTAM he shall be called, Gen. xvii. 5, for PVNAM, from PVA. Also, TTAVNM, from AVM. The prefix NA is sometimes found written NT, though rarely. The first person of this conjugation sometimes ends in MA; as, Deut. xxxiv. 4, MAVDAWA I sware. The second person plural feminine sometimes also ends in MM instead of TM.

- 13. In the imperative mood, instead of A we find 3, though, as far as I have observed, this is not very frequently the case; as, Gen. xlii. 16, 3944.
- 14. The usual form of the infinitive of this conjugation is that first given in the paradigm: the other forms are to be explained in the same manner as in § 10. The two instances, viz. 574934, Gen. v. 2, and 9473, Gen. xvii. 13, given by Cellarius, are undoubtedly of the fifth conjugation, which has sometimes a passive sense, as we have shewn in § 5.
- 15. Remarks on the third conjugation:—The difference between this conjugation and the first has been previously pointed out. It is important to observe that the quadriliteral verbs, as ABLA he formed, AAR he consoled, AAR he poured forth, belong to this conjugation, as they do in the Syriac.

Castel marks this conjugation by the insertion of m (to express the vowel Tsere) between the last two radicals; as, Smyz. It is found in Deut. ix. 12, under the form 2/49% have become corrupted, with which mater lectionis the last syllable of the root may be usually pronounced.

The imperative of this conjugation is formed like the Syro-Chaldaic. The infinitive, like that of Pehal, is capable of receiving the terminations  $\Lambda$ ,  $\Lambda$ 7, under the circumstances mentioned in § 10.

The participles of this conjugation, as well as the imperative, are formed like the Syro-Chaldaic.

16. Remarks on the fourth conjugation:—What has been said of the second conjugation will also apply here; the usual forms of the infinitive are MITTIME and MITTIME.

17. Remarks on the fifth conjugation:—It has been previously stated (§ 5) that Aphel has sometimes a passive sense. The prefix is often changed to it as, Gen. xxxv. 2, is often changed to it as, Gen. xxxv. 2, if it is, however, very rarely used.

The usual form of the infinitive is that given in the paradigm: other forms are met; as, Gen. xxix. 7, which to be collected. Also ALTA to be circumcised, Gen. xvii. 13.

The participial forms in use are Tram and Tmram.

18. Remarks on the sixth conjugation:—This conjugation is thought by Castel to arise from the absorption of the second  $\Lambda$  of the Syriac Ettaphal; thus,  $\nabla P^{\mathbf{m}} \Lambda \Lambda \Lambda$  is read for  $\nabla P^{\mathbf{m}} \Lambda \Lambda \Lambda$ ;  $\nabla P^{\mathbf{m}} \Lambda \Lambda \Lambda$  for the Syriac  $\nabla P^{\mathbf{m}} \Lambda \Lambda \Lambda$ ;  $\nabla P^{\mathbf{m}} \Lambda \Lambda \Lambda$  for the Syriac  $\nabla P^{\mathbf{m}} \Lambda \Lambda \Lambda$ ; in the formation of which one of the Syriac  $\Delta$ 's is omitted.

These remarks will be sufficient for the *perfect* verbs. We now proceed to the consideration of the *imperfect* verbs.

## IMPERFECT VERBS.

19. Those verbs which, on account of certain peculiarities in their roots, vary in their inflection from the paradigm previously given of a *perfect* verb, are called *imperfect* verbs. They are divided into three classes; Defective, Quiescent,

and Anomalous verbs; in which order they will be considered.

#### DEFECTIVE VERBS.

20. Of these verbs there are two classes,—those which lose their *first* radical, and those which lose their *second*.

The verbs of the first class are, as in Hebrew and Chaldee, such as have *Nun* for their first radical; those of the second class, such as have their second and third radicals the same.

#### DEFECTIVES OF FIRST CLASS.

- 21. Verbs of this class follow, for the most part, the same rules as in the Hebrew and Syriac. The future of the indicative, the imperative, and infinitive of Pehal, also the whole of the conjugation Aphel, omit, generally speaking, the '\(\frac{1}{2}\). These verbs are, for the most part, regular in the other conjugations, except Ettaphal.
- (a) Examples of the future of Pehal are, ዓፈጠ for ዓፈነጠ; የፈነ for የፈነኔ we will go up; ነጻፈ ጠ for ነጻፈ ነጠ, etc.
- ( $\beta$ ) Examples of the imperative are, PA for PA;  $A\nabla$  for  $A\nabla$ ;  $A\nabla$  for  $A\nabla$  for
- (γ) Examples of the infinitive are, এছন্ম for এছন্ম; প্রমান্ত for প্রমান্ত, etc.
- (১) Examples of Aphel are, PAA and PAA, Gen. xiv. 18; PAত্ৰৰ causing to go up, Lev. xi. 45.
- (ε) Examples of Ettaphal are, ΛΥΛΜ Exod. xix. 11, for ΛΥΊΛΜ; ΛΜΥΛΑ, Num. x. 17.

Cellarius gives two instances in which a is omitted from the perfect; as, Gen. xiv. 10, 323; also, xxiv. 63, pa he went

out. This is, however, very rarely the case, and such deviations are remarkable rather as anomalies. Many of these verbs are regular; as, Aus he slew, 222 he fell, etc.

The sense of the different conjugations is, of course, the same as in the perfect verb.

#### DEFECTIVES OF SECOND CLASS.

- 22. Verbs of this class are mostly regular; the chief irregularities are observable in the whole of Pehal (the participle excepted), and in the whole of the fifth conjugation, where the third radical is usually omitted.
- (a) Examples of the preterite of Pehal; Gen. xxxviii. 11,  $2\nabla$  he entered, for  $22\nabla$ , which is found in full, Gen. xiv. 5. So Gen. xxxviii. 9, with  $\kappa$  interpolated,  $2\kappa\nabla$ . The feminine of the third singular is found in full  $\kappa 22\nabla$ , but without the last radical,  $\kappa 2\nabla$ , Gen. xlii. 21. Similarly  $32\nabla$  and  $32\kappa\nabla$  are read for  $322\nabla$ , etc.

For the future, 20mm Gen. xxxii. 11, psma, psma, like pps of Castel.

- ( $\beta$ ) Examples of the imperative mood are;  $2\nabla$ , Gen. xxx. 3, also read fully  $22\nabla$ . The feminine singular is found in full, Num. xxi. 27,  $m22\nabla$ . The plural  $32\nabla$  for  $322\nabla$  is found, Deut. i. 7.
- (γ) Examples of the infinitive are, 272 $\nabla$  for 27 $\nabla$ , or in Pahel for 27 $\nabla$ 5, Exod. xvii. 12. So promes in Pahel, etc.
- (δ) Examples of the fifth conjugation: perfect, 2VA and 2AVA for 22VA, etc.; future, 2AVA, Gen. xxvii. 10. Imperative mood, 2V3 Exod. vi. 11, or with a mater lectionis, 2AV3. The form 23, found in Exod. x. 1, seems to be contracted from 2V3. Infinitive mood, Λ2AV3 for Λ22V3, Deut. ix. 28.

- (e) The instances given in the preceding paragraphs, in which the forms are uncontracted, seem to belong to the conjugation Pahel; in fact, the only means of distinguishing the first and third conjugation in form appears to be by considering the apocopated forms to belong to Pehal, and the perfect forms to Pahel; as, \$22\$\nabla\$, Gen. xix. 10; 22\$\mathbb{Z}\$, etc.
- (ζ) The passive of Pehal is not apocopated; as, PPSAA, etc.; while Ettaphal loses its middle radical; as, PSAA, etc.

The observations made in this and the preceding section will be found sufficient without a paradigm.

#### QUIESCENT VERBS.

23. Verbs are called *quiescent* whenever, among the letters constituting the root, any one of the quiescents  $\mathfrak{A}$ ,  $\mathfrak{K}$ ,  $\mathfrak{M}$ ,  $\mathfrak{A}$ , as they are improperly called, is found.

These verbs may be divided into three classes; first, such as are *quiescent* in the first radical; second, those which are *quiescent* in the second; third, those *quiescent* in the third radical.

The Samaritan mode of inflecting these verbs is very like the Syro-Chaldaic.

## QUIESCENTS OF FIRST CLASS.

# In Aleph, or Pe-Aleph.

24. The class of verbs, whose first radical is  $\kappa$ , is inflected more like the *perfect* verb than any other class of *quiescents*. The following observations will supply the place of a paradigm. In the first and fifth conjugations, the initial  $\kappa$  is changed into m whenever it is preceded by a

servile formative. For example, in Pehal, from and comes amak I will say; so, for and we find amam, etc.

The same law is also observable in the passive forms; as, Gen. xvii. 1, 24mmx walk; 2mmx, also 2mmx, etc.

The Aleph is sometimes omitted; as, Deut. vii. 10, AAATH; but in Gen. vi. 21, the apocopated form 25AM is given, unless it be read 25MM, Aphel used in a passive sense.

Cellarius adduces an instance in which the quiescent is changed to  $\pi$ ; as, 2 / 4 / 3 / 3, Gen. xi. 31. This is very rare, and I cannot call to mind another instance of it.

In such forms as 2273, 22772, etc., the sis manifestly changed to 7; this sometimes takes place in Aphel, as well as in the passive forms. There does not seem to me, however, to be any reason for exclusively confining this metabole to those conjugations. The example adduced by Cellarius, viz. 2273, in the conjugation Aphel, may also be referred to the first or third conjugation.

# In Yod, or Pe-Yod.

25. The quiescents whose first radical is n are formed much in the same way as Hebrew verbs of the same kind.

The Yod is usually omitted in the future and imperative of Pehal, but in Aphel is changed to 7.

- (a) Examples of the future: 93% for 93m%; 9%% for 9%m%; though it may be written regularly as %9mm, Gen. xxi. 10, not %9m.
- ( $\beta$ ) Examples of the imperative mood are,  $9\Lambda$  for  $9\Lambda$ m sit thou; so from 92m we have 92, m92, etc.
- (γ) Examples of the fifth conjugation: גאָלא I will add, Gen. viii. 21; אין for אין. The infinitive אַגאַלאַל,

Gen. xlv. 5, etc. There are cases, however, in which the m is not changed; as, Gen. iv. 7, MATMA, instead of MATA. Again, 29ma for 2974, Exod. xiv. 21.

- (8) The m sometimes undergoes the same change for the passive conjugations as in Aphel; thus, 9.77.7.7; m37.7.7 from a radix 33m, etc.
- (e) Those cases in which the m is omitted in the perfect tense, as in Gen. ix. 23, where \( \pi \)2 is found for \( \pi \)2m, are to be marked as anomalies. The same may be said of the presence of Yod where it should be absent; as \( \pi \)7mm, Deut. xxxi. 19.
- 26. Verbs in Aleph and Yod are usually regular, except in the cases mentioned in the preceding sections.

#### QUIESCENTS OF SECOND CLASS.

# In Vau, or Ayin-Vau.

27. The only class of verbs worthy of note under this head are those whose middle radical is Vau. The following paradigm with  $\mathfrak{ZP}$  or  $\mathfrak{ZP}$  will give the student an idea of the peculiarities of verbs of this class:—

## I. PEHAL.

# PARTICIPLES.

Present MAP Past MMP

28. Remarks on the first conjugation:—The preterite of this conjugation strongly resembles the Syriac. In the paradigm of Pehal, we have given two forms of the third person singular, one with and the other without the mater lectionis. The third person plural may be similarly written; as, TMP, Gen. xxxvii. 35; in fact, the mater lectionis is sometimes absent in the other persons.

The future tense is generally read with  $\tau$ ; it is, however, found without it; as, Deut. xiii. 8, Arms it shall spare;  $\tau$  arm they will go, for  $\tau$  arm, Exod. xxxii. 1;  $\tau$  for  $\tau$  for  $\tau$  Deut. xxviii. 52.

The imperative mood is like the Chaldee and Hebrew. When the ultimate or penultimate is a guttural or Resh, the Vau is frequently omitted; as, 99 inhabit, Gen. xxxv. 1, for 979; also, 23 go, etc.

In this case the 3, though omitted in the imperative, is sometimes found in the future; as, 939A, Gen. xxiv. 55; the rule, however, for omission in the future is, generally speaking, the same as that for the imperative.

Of the infinitive mood, we have given various forms; those which are preceded by belong rather to the third conjugation; thus, and belong rather to the third conjugation; the third conjugation is to be evil. Compare also and the third conjugation is to be evil. Compare also and the third conjugation is to be evil.

The mater lectionis of the participle of the present is sometimes changed to  $\nabla$ ; thus, instead of MAP, we find MVP, Exod. iii. 5; sometimes A is changed to A, as in the anomalous verb AHM; sometimes for Aleph, AH or AM is written; as, AAHT, Num. xiii. 20; MAMT, Gen. xv. 14, etc. Such forms seem to carry considerable emphasis.

- 29. Remarks on the second conjugation:—This conjugation is like the Syriac in its formation; thus, AMANA was pleased, Gen. iv. 5; AMANA, Exod. xxxii. 30, etc. The student who is acquainted with the paradigm of the Syriac verb in Ayin-Vau will find no difficulty in recognising the tenses, etc., of the conjugation Ethpehel.
- 30. Remarks on the third conjugation:—This conjugation may be generally known by the characteristic m, as in the Syriac. It is, however, rarely used. Compare the Chaldee Pahel.
- 31. Remarks on the fourth conjugation:—This conjugation is sometimes read with the characteristic m; as, mmpaa. The difficulty of distinguishing between it and Ethpehel may have led to the adoption of  $\tau$  instead of m, and the duplication of the last radical; as, 2279 $\Lambda$ A, Gen. xvi. 2;  $\Xi$
- 32. Remarks on the fifth conjugation:—Aphel is generally accompanied by the mater lectionis m; as, Imia; though the m may be omitted before the syllabic suffixes; as, ANDA, Gen. xxi. 29; AADI, xlv. 4. There are some few instances in which A is put for m; as, VAVM shall distress, Deut. xxviii. 53, 55. The characteristic preformant A is very frequently changed to A, as in the perfect verbs.
- 33. The sixth conjugation is scarcely distinguishable from the second, except as regards the sense.

## QUIESCENTS OF THIRD CLASS.

34. The quiescent verbs of this class have  $\kappa$ ,  $\mathfrak{A}$ ,  $\mathfrak{m}$ ,  $\mathfrak{T}$  for their third radical. The two latter terminations are rarely found; thus,  $\mathfrak{m}_{\Lambda}\mathfrak{A}$ , Num. xxiii. 21, which is

usually quoted as Pehal, seems to be Pahel, from the root and. The two other instances given by Cellarius, viz. mvx, from Gen. xxxvii. 35, and xxx, Exod. vii. 20, may be obsolete forms, at least the latter; for the former may be considered as Pahel, the first conjugation Pehal not being in use.

The usual termination of quiescents of this class is  $\Im$ . The following is a paradigm of verbs of this kind with  $\Im \mathcal{D}$  he wept.

## I. PEHAL.

35. Remarks on the first conjugation:—The feminine plural of the third person of the preterite occurs Exod. ii. 16; as, malify mark they came and drew, and filled; it will be observed that the quiescent is not omitted in malify before m. This is also the case in marky, Gen. xxxii. 30. Compare remarks in § 7.

The quiescent letter may remain unchanged in the future; as, 3393, Gen. xi. 4. The Chaldee corresponds exactly with the Samaritan, if we suppose the terminal & changed to .

An instance of the feminine singular imperative is MTA, Gen. xxiv. 60. The form given in the paradigm for the feminine plural of the imperative is like the Syriac in Castel has ATALY, the Syriac The Chaldee termination may also be added to the root; thus, AMAS. As far as I am aware, I do not think that any example exists, at least in the Pentateuch, to settle the matter definitely.

The infinitive is generally accompanied by the prefix w;

as, מששל to number, Gen. xv. 5; מאב to see, Exod. iii. 4.

The plural feminine of the participle is found in Gen. xli. 54, 3,4779. It will be observed that Benoni and Pehil do not differ in form.

- 36. Remarks on the second conjugation:—The following are examples of the preterite: Gen. xvii. 1, magaas; mgawas, Exod. xiv. 21; ammaas, Gen. xxxii. 30, etc. An instance of the future will be found in Gen. ix. 14.
- 37. Remarks on the third conjugation:—This conjugation is usually terminated in the third preterite by m; as, mAx, Exod. xv. 25; mAx, Gen. xxix. 13.

The other instances given by Cellarius, viz.  $3 \sqrt{4}$  and  $3 \times 2 \sqrt{1}$ , are of the conjugation Pehal.

- 38. The passive of the third conjugation cannot be distinguished from that of the first, except by the sense; they have the same forms.
- 39. The fifth conjugation is supported by the following examples:—For the preterite—Gen. xix. 24, MYZX; AXYWA, viii. 9; AVA, viii. 13; AYXX, xxxi. 20. For the future—MYYA I will increase, Gen. xii. 2; MYAA, xv. 1; though in both cases they may be preterites for the future. (See the Syntax.) For the imperative mood—MYYA, Gen. xxiv. 14. For the infinitive mood—AAYWY, Gen. xxiv. 19; AAMYY, xxxvii. 22. For the participle—MYYY, Gen. vi. 17. In the infinitive and participle, the examples produced are exceedingly pertinent.
- 40. Cellarius has given the form m27///, from Castel, as belonging to the sixth conjugation; it occurs but very seldom. The following paradigm contains the remaining conjugations.

#### ANOMALOUS VERBS.

41. This class of verbs must be distinguished from the *Defectives* and *Quiescents*, inasmuch as the latter are regular, though varying from the paradigm of a perfect verb, while the former apparently follow no regular rule, but, in consequence of peculiar combinations of letters, undergo certain changes which sometimes cannot be accounted for by referring them to any class of verbs previously considered. There are ten of these verbs which, from their frequent occurrence, may be advantageously explained in this place.

# I. THE SUBSTANTIVE VERB 373 he was.

#### IMPERATIVE MOOD.

Person.	Singular.	Plural.
. 1	M. MTZ	773
2.	F. MTA	(ETMMC)

#### INFINITIVE MOOD.

ותאש, or און Gen. xviii. 18.

There are no participles. The third masculine future is sometimes further apocopated; as, ma, Gen. xxviii. 14. The first person masculine is also read max, Gen. xvii. 8. This verb is, for the most part, regular in the perfect tense of the indicative, and in the imperative mood, both of which follow quiescents of the third class.

## II. THE VERB MITS there is.

This verb is the same as the Syriac A and Hebrew D; it is frequently found in the Syriac New Testament. Examples of the Samaritan are, Exod. xvii. 7, AMAS TEAM ' 12979 Is God among us? The medial letter IT is sometimes omitted; as, 173 ' 19AAS ' 173M' AA' 123A truly God is in this place, Gen. xxviii. 16.

The initial letter is often omitted, especially when suffixes are used; as, AAM'A if thou art, Gen. xxiv. 42; ATHAMA, whether ye are, Deut. xiii. 3. The negative adverb AM2 is compound of this verb and A2. Compare the Syriac Aba which is derived from and Ab by crasis and ecthlipsis. (See Schaaf's Syriac Lexicon.)

# III. THE VERB ama he lived.

#### PEHAL.

This conjugation, which has an intransitive sense, is rarely used; as, man she shall live, Gen. xii. 13; xxvii. 40; man, Gen. iii. 22, which should be read man, vide Deut. v. 26; har ye shall live, Exod. i. 22.

#### PAHEL.

This conjugation, which is transitive, is often found; as, TMAM MMAM they will save thee alive, Gen. xii. 12; AMAA I will make alive, Deut. xxxii. 39. It is also found written AAA; as, TAA keep alive, Num. xxxii. 18. Compare AAATM, Gen. 1. 20, which is rather of the fifth conjugation.

#### APHEL.

This conjugation is formed from a root which may be supposed to arise from the *metathesis* of the initial radicals, viz. ARM; as, MRTA he lived, passim; ATAMRTA saved alive, Num. xxxi. 15; BV ARRTB2 to save the people alive, Gen. 1. 20, xlv. 5.

## ETTAPHAL.

This conjugation is used intransitively; as, MUTAAA, he lived, Gen. xxv. 7; TUAA live, Gen. xlii. 18.

The other conjugations are rarely met with.

# IV. THE VERB AVA he descended.

This verb, which is the same as the Syriac ביים and Chaldee יְּהָהַל, is written for אָבָה, whence it is formed by changing אַ into ∇.

#### PEHAL.

#### INDICATIVE MOOD.

## Perfect Tense.

This is, for the most part, regular. Sometimes the primitive form is read; as, ANYS she let down, Gen. xxiv. 16, 45.

# Future Tense.

	Singular.	Plural.
2	$\left\{ \begin{array}{ll} \mathbf{M}. & \boldsymbol{\Lambda} \boldsymbol{\nabla} \boldsymbol{\Pi} \boldsymbol{\Pi} \\ \mathbf{F}. & \boldsymbol{\Lambda} \boldsymbol{\nabla} \boldsymbol{\Pi} \boldsymbol{\Lambda} \end{array} \right.$	MWAYE
υ,	F. NOMA	mmv~c
9	M. ∧∇m∧ F. ≒m∧∇m∧	<i>ጎ</i> ₹ሉ∇ <i>ሉ</i>
4.	F. AMAVMY	<b>∆</b> Λ∇Λ
1.	A. DULY	$\zeta$ m $\Delta$ V

N.B. It must not be inferred that all these forms are in use; some few are given by analogy. ATAVA occurs in Gen. xlii. 38, xliv. 29, but, from its transitive sense, may be referred to Pahel or Aphel.

#### IMPERATIVE MOOD.

Person.	. Singular.	Plural.

0	$\int M.$ $\Lambda \nabla \Lambda$	₹ <b>ሉ</b> ∇ <b>⅍</b>
2.	F. MAVA	*\ <u>\</u> \\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\

## INFINITIVE MOOD.

# AVIII Gen. xxxvii. 25.

The passive form of this verb also occurs; as, AVIIIAA, Gen. XXXIX. 1; AINVAA, Num. x. 17, etc.

# V. THE VERB 93M he gave.

## PEHAL.

## INDICATIVE MOOD.

## Perfect Tense.

This is formed regularly. The instance amam, from Lev. x. 17, given by Cellarius, must be referred to Pahel. Compare Lev. xix. 20.

## Future Tense.

This is regular, like verbs in Pe-Yod. It is, however, sometimes formed from אָלָה, Hebrew בָּתוּ

### IMPERATIVE MOOD.

Person.	Singular.	Plural.	
ſM.	An; also, Ar Gen. xxx. 26;	39A	
2. {	93 Gen. xlii. 37.		
LF.	M73 Gen. xxx. 14.	*PECE	

### INFINITIVE MOOD.

שאדל שאל

### PARTICIPLES.

Present.	Past.	
93m; also, 93	ma Gen. xlix. 21.	meme

The latter participle appears to be used in Gen. xxxviii. 14, agmam she was given. This is probably the case with the instances mentioned under the perfect tense. In Lev. xix. 20, our version has "liberty given her," though it should rather be he has not given her liberty; a change of nominative which has been adopted in Lev. x. 17, correctly.

The passive forms also occur; as, THMMA, Lev. x. 14; THMMA, Lev. xxvi. 25; HMMM, Lev. xxiv. 20. Also the participle HMMM, Exod. v. 16, 18.

## VI. THE VERB AZE he died.

This is the same as the Syriac A. Chaldee nin.

### INDICATIVE MOOD.

## Perfect Tense.

The middle letter of the whole of this tense is m; as, Amy he died; AAmy she died, Gen. xxiii. 2; AAmy they died, Exod. iv. 19, etc.

## Future Tense.

This is exactly like verbs in Ayin-Vau; as, ATWA, ATWA, etc.

### IMPERATIVE MOOD.

Singular. Plural. AT型 Deut. xxxii. 50. スペス型

### INFINITIVE MOOD.

ששמת ששהע שהגע

## PARTICIPLES.

Present. Past.

### APHEL.

### INDICATIVE MOOD.

The perfect and future tenses are formed as usual; thus, mana he brought, Gen. xxxvii. 2; mann he shall bring, etc.

### IMPERATIVE MOOD.

Singular.

Plural.

MAMA

3MMX

#### PARTICIPLES.

mams Exod. x. 4.

mamay Deut, viii, 16.

This verb is very frequently used in Pehal.

## X. THE VERB 25m he was able.

## INDICATIVE MOOD.

The perfect tense of this verb is regularly inflected.

The future follows the law of verbs in Pe-Yod; as, 23% I shall be able, Deut. xxxi. 2; 23%, thou shalt be able, Exod. xviii. 23, etc. There are cases, however, in which the Hebrew anomaly is adopted; as, 237% I shall be able, Num. xxii. 11.

The infinitive, 2733, occurs Num. xiii. 31.

## CHAPTER IV.

## THE PARTICLES.

1. The Particles, which form the third part of speech, are generally understood to comprehend the Pronoun, Adverb, Preposition, Conjunction, and Interjection; or, in other words, all those parts of speech recognized in Greek and Latin, and in the modern European languages, with the exception of the Verb and Noun.

### PRONOUN.

2. The Pronoun, as being the most prominent and important of the grammatical divisions included in the term Particle, will be considered in the first place. The Samaritan pronouns may be divided into two classes, as in the other Shemitic languages, viz. Separables and Inseparables; the latter (except the relative) are sometimes called Suffixes, the propriety of which term will appear hereafter.

Under the head of Separables are included, Personal Pronouns in the nominative and vocative cases, Demonstratives, sometimes the Relative (which is, however, generally expressed by a prefix), and the Interrogative Pronouns.

Under the head of *Inseparables* are classed, Personal Pronouns in the oblique cases or preceded by a preposition, Relative, Reflexive, and Possessive Pronouns.

### SEPARABLE PRONOUNS.

#### PERSONAL.

3. The personal pronouns are, as in other languages, of the first, second, and third persons, in both numbers. There is only one form for both genders of the first person in each number; in the other persons there is a distinct form for each gender, as the subjoined table will shew:—

### TABLE OF PERSONAL PRONOUNS.

Pers.	Singular.	Plural.
1. com. \\ \( \frac{1}{2} \rac{1}{2} \rac{1}	ו אלצח ,אלח I.	שלבל, אלאלע we.
2. ⟨M. ¾ΛΛ. F. MΛΛ.	$\left.\begin{array}{c} ,\; \bar{\mathcal{N}}\mathcal{N} \end{array}\right.$	57114 }ye.
3. {m. 1474, F. 14114,	TA he.	hey.

There is another form of the first person singular, viz. אָלֵאָ, which sometimes occurs; this form and that first given in the table correspond exactly to the Chaldee אָנָהְיּ and אָנָהְיּ; while the second and third forms are the Hebrew and אַנִּיִי and אָנִיִּי . The two forms of the second person masculine are the same as אַנִּהְיּ and אָנִּיִי.

The second person feminine is found in Gen. xxiv. 23, without a line over it; it corresponds to the Hebrew ኳኳ, which is usually written ኯዄ.

The first form of the third person masculine is the same as אוֹה, while the second is the Syriac סָּכוּ.

With the first form of the third feminine, compare the Chaldee and Hebrew הָּיא.

The second form of the first person plural is manifestly the Chaldee ্লে.

With the forms of the second plural, compare the Chaldee אַנְתּין, אֵנְתִּין.

With the two forms of the third plural, compare הַנּין masc. and הַנִּין fem.; for, by interchanging the quiescents ה and א

'of the same organ,' the Chaldee forms are easily transformed to the Samaritan.

### DEMONSTRATIVE PRONOUNS.

4. These are included in the following table:-

Singular.

M. 47, AMA, AMVA this.

F. AT, AAT this.

C. 4M2A these, those.

C. 47, AT this, that.

Compare the first form of the masculine singular with the Chaldee בין, and the second and third with the Hebrew מָּה.

With the feminine forms, compare the Chaldean N7.

The first forms of the masculine and feminine, as will be observed, are repeated as of common gender; this arises from their indiscriminate use, somewhat similar to that of among the Hebrews.

With the common form of the plural, compare אָבֵין.

It must be observed, that many of the Personal and Demonstrative Pronouns receive a emphatic as a prefix; thus, and that very place. Again, and and these very stones.

### RELATIVE PRONOUNS.

5. Like the Hebrews, the Samaritans have a separable relative pronoun, viz. and; its use, however, is generally superseded by the prefix a, like the Chaldee a from 7. It is common in number and gender; thus, analyse thy stranger, who is in thy cities, Exod. xx. 10; arrange, thy gods, which brought thee up, Exod. xxxii. 4.

### INTERROGATIVE PRONOUNS.

6. There are two forms of this pronoun; the first \u03c4, Chald. \u03c42, which is used of persons, and equivalent to our who?—the second \u03c43, Chald. \u03c42, used of things, and like our what? Thus, \u03c444. \u03c423 \u03c444. \u03c423 \u03c444. \u03c423 \u03c444. \u03c444 \u

It is probable that \(\mathbb{Z}\)Ty, synonymous with \(\mathbb{Z}\)Ty, as well as \(\mathbb{Z}\)The soul, are used as reciprocals, in the sense of the Latin 'seipsum.' This inference is justified by the numerous examples found in the New Testament, in which it is so employed by the Syrians.

The Samaritans apparently use TTA the heart, reciprocally; as in Gen. xviii. 12, where we find 'AAM' ATATTA and Sarah laughed within her heart, i. e. herself.

### INSEPARABLE PRONOUNS.

7. These Pronouns, which may also be called *suffixes*, from the peculiarity of their being joined to the end of

words with which they coalesce, include the Personal Pronouns with a preposition, Reflexives, and Possessives.

They are contained in the following table:-

Pers	on.	Singular.	Plural.
1.	com. n	ב'וו , ו	۵, کد
2.	{ M. ∺ F. ∺	1, 25 1m, 25, 2	לבדל ,דבדל ,בדל לבדל ,בדל ,בל ,בחל
3.	{ M. ₹ F. ₹	, 7, 35 , 25	לדל, דל, דלל (בדל (בדל (בדל (בדל (בדל (בדל (בדל

These inseparables are not joined to nouns, verbs, and particles *indiscriminately*; it will be proper therefore to make a few remarks on their use.

With respect to the *first* person, it must be observed, that the form m of the singular is joined to nouns of both numbers; thus, from and comes man my lord; from man sons, we have mman my sons, which is contracted into man, as in the Hebrew.

There are some instances in which m is joined to verbs; as, mx2<sup>m</sup> he sent me, Gen. xlv. 5, Exod. iii. 14. This is frequently the case when the letter immediately preceding the suffix is essentially radical.

The second form, however, is that usually found with verbs; as, MINING thou hast blessed me; MINING he shall see me, etc.

Both forms of the first person plural are used with nouns and verbs; instances of the first are, 55424 our God; 55499 our sepulchres; 55494 our fathers. Again, 55444 he made us go up, Exod. xxxii. 1; 554754 thou

hast led us out, Num. xxi. 5. Instances of the second form are, ጎለଅጠ2ሉ our sister, Gen. xxiv. 60; ጎለብርጃ he delivered us, Exod. ii. 19.

8. Upon the suffix 3 of the second person, the following remarks may be made.

It is found with nouns of both numbers for the masculine gender; and, for the feminine gender, with nouns plural; as, \$\pi\2\mathbb{A}\partrightarrow your God; \$\pi\A\A\A\A\Rightarrow your son and your daughter; \$\pi\A\A\A\Rightarrow your fathers; \$\pi\A\A\A\Rightarrow your eyes, etc. In Gen. xix. 12, \$\pi\$ is inserted before the terminal \$\pi\$; for, in speaking of Lot's daughters, we find \$\pi\A\A\A\A\Rightarrow your daughters. This insertion of \$\pi\$ must not be confounded with the feminine form \$\pi\pi\$, which is used with singular nouns; as, Gen. iii. 16, \$\pi\A\A\Rightarrow \Rightarrow your husband; \$\pi\nabla\Rightarrow \A\Rightarrow your seed, Gen. xxi. 10.

The form  $\sharp$  is also found with verbs; as,  $\sharp\sharp \sharp \mathfrak{h}$  he loved thee;  $\sharp \wedge \sharp \sharp \mathfrak{m} \mathfrak{p} \wedge \mathfrak{s}$  have I established thee, Exod. ix. 16;  $\sharp \mathfrak{k} Z^{\mathfrak{m}} \wedge I$  will send thee, Gen. xxxii. 26. The terminal  $\sharp \mathfrak{h}$  with the epenthetic  $\mathfrak{h}$  is usually found with the future tense; as,  $\sharp \mathfrak{h} \mathfrak{h} \mathfrak{h} \mathfrak{h} \wedge I$  will make thee, Gen. xii. 2;  $\sharp \mathfrak{h} \mathfrak{h} \wedge I$  will restore thee, Gen. xxviii. 15, etc.

The m of the feminine form an is usually omitted when joined with a particle; as, as to thee, Gen. xx. 16; as from thee, Gen. xxx. 2; and is found in Exod. ii. 7.

The first form \(\frac{1}{2}\) of the second person plural masculine is found with nouns and verbs; but with the latter it is generally not suffixed immediately, but with the interposition of the characteristic of the accusative case; as, \(\frac{1}{2}\) \(\frac{1}{2}\) your God; \(\frac{1}{2}\) \(\frac{1}{2}\) \(\frac{1}{2}\) your fathers; \(\frac{1}{2}\) \(\frac{1}\) \(\frac{1}{2}\) \(\frac{1}{2}\) \(\frac{1}{2}\) \(\frac{1}{2}\) \(\frac{1}

in this case the second form אמצל is usually employed; as, אמצל from you, Deut. ii. 4, etc.

The last form in both genders, viz. 5735, is a verbal suffix, and is formed by means of the *epenthetic* 5, from 575, like 35 from 5.

The first two forms of the feminine plural are joined to nouns; as, 'mwwy' your soul; sometimes by the insertion of 7, as in the case of the masculine suffixes; thus, 'mwy9\* your father, Gen. xxxi. 5. The other forms of the feminine are found with verbs.

9. The form  $\mathfrak{F}$  of the third person singular is found with nouns of both numbers, also with verbs; as,  $\mathfrak{F}$  his head;  $\mathfrak{F}$  her seed;  $\mathfrak{F}$  may he set him, Gen. xlvii. 7;  $\mathfrak{F}$  has a large him forth, Exod. ii. 10. In the masculine gender,  $\mathfrak{F}$  is sometimes suffixed by the interposition of  $\mathfrak{F}$ ; as,  $\mathfrak{F}$  his father-in-law, Exod. iii. 1;  $\mathfrak{F}$  has he shewed him, Exod. xv. 25. The  $\mathfrak{F}$  was probably added to mark distinctly the difference between the word and its suffix. Compare remarks on verbs,  $\S$  7.

The second form 3 of the masculine gender, is used with plural nouns, as, אמימידער his eyes; אומי his sons, Gen. ix. 1; Chald. בּנוֹהִי, Syriac בֹּבוֹבֶּי, etc.

This terminal is found also with singular nouns and particles, in which case m is inserted before the suffix; as, and his father, Gen. xlvi. 1, xlvii. 11; and his brother, Exod. xvi. 15; and upon him, etc.

The suffix 33 of common gender, formed by the epenthetic Nun from 3, is used with verbs; as, 33PNBA I will

destroy him, Exod. xxxii. 33; אמראלאה shall hate her. Deut. xxii. 13. It must be observed that it is mostly employed with the future tense, and, comparatively speaking, is very seldom found with the preterite; as, אמריש he placed him, Deut. xxxii. 10.

The third form, \$75, is masculine, and is only employed with verbs; as, \$75399\$\$\textit{K}\$ I will bless them, Num. vi. 27; \$7537\$\textit{K}\$\$\textit{K}\$\$ they struck them and bruised them, Num. xiv. 45. This suffix is not, however, used exclusively, since the simple form \$7 occurs; as, \$72\$\$\textit{K}\$\$ he slew them, Gen. xiv. 16; \$779\$\textit{K}\$\$, Num. xvi. 39. Vide Deut. ix. 17.

The feminine forms of this person, viz. AMA and AM, are used with nouns of both numbers; as, AMATAWA their judgment, Num. xxvii. 5; AMATAM their father, Num. xxvii. 7, etc.

The last form, 33 of the feminine gender, may be joined to verbs, but very seldom occurs. The student must be careful to distinguish it from the same form, which is used for the first person plural.

These pronouns, it will be observed, serve for the Personal Pronouns in the oblique cases, for the Possessives, and Reciprocals.

10. The relative pronoun is usually expressed by the prefix  $\S$ , which is employed like the Chaldee  $\S$ .

### ON THE MODE OF SUFFIXING.

11. In adding the inseparables to nouns of the absolute state, the \(\frac{1}{3}\) characteristic of the feminine is changed into \(\Lambda\); as, \(\frac{1}{3}\) a handmaid, \(\mathbb{M}\) \(\frac{1}{3}\) my handmaid, \(\mathbb{G}\) en. xvi. 2. If the noun be plural, the terminal \(\mathbb{G}\) or \(\frac{1}{3}\) of the plural formative is omitted, and the suffix added to the remaining part; as, from \(\mathbb{M}\) sons, comes \(\frac{1}{3}\) his sons, etc.

But if the noun be in the emphatic state, the  $\Im$  is wholly omitted, and the suffix takes its place; as,  $\Im^{u}\Im\Im$  the soul,  $\Im^{u}\Im\Im$  my soul;  $\Im^{v}$  the wife,  $\Im^{v}$  thy wife;  $\Im^{v}$  fathers,  $\Im^{v}$  our fathers.

12. There are three nouns which deserve especial consideration; these are, As a father; Ks a brother; Ks a father: Ks a brother; Ks a father-in-law. These nouns are connected with their suffixes by inserting 7, like the Chaldee and Syriac; or M, like the Hebrew.

The following are examples of this peculiarity:-

Examples of 914; as, 37914, 27914, 2737914, etc., with 7; 7m914, 27m914, with m.

Examples of MA; as, MTMA, ATMA, MITTA, etc., with T; and TMMA, MMMA, etc., with M.

Examples of wy are rare; as, mtwy, Exod. xviii. 1; umtwy, Gen. xxxviii. 13. Also with m in Gen. xxxviii. 25; as, smwy her father-in-law.

This is not, however, the case with the suffix of the first person; for in Gen. xx. 12, we find make had daughter of my father; and in Gen. iv. 9, alk make are am I my brother's keeper? In both these instances, however, the nouns are in 'regimen,' which may probably account for the deviation from the general rule.

13. The suffixes are usually added to verbs without changing any letter; as, magazia he led me, Gen. xxiv. 27; arran they made thee go up, Exod. xxxii. 4, etc.

Quiescents of the third radical in A or I sometimes vary from this rule. These letters may be changed into A; as, ITALL he numbered them, Num. i. 19; LAMLI he delivered us, Exod. ii. 19; LIALL he overlaid them, Exod. xxxvi. 36. They are also sometimes omitted; as, MLALL he shall see me, Exod. xxxiii. 20.

- 14. The epenthetic \( \) between the verb and its suffix is so often used by the Samaritans, that, by coalescing with the suffixes themselves, an entirely new series would seem to have arisen. See the table, p. 72.
- 15. The interposition of A which sometimes occurs may be accounted for by supposing it to be a contraction of the case-mark AM; thus, AALEV, Deut. iii. 3, is the same as AAM LEV; similarly, LAAAM for LAAM they saw them. In fact, the pronominal suffixes, especially LAM and LA, are frequently found separated from the verb by AM; as, LABAM LAAM he will bless you, Deut. i. 11; LAAM LAAM he blessed them, Exod. xxxix. 43.
- 16. There are cases in which the methods employed by the Hebrews in suffixing the particles have also been adopted by the Samaritans; thus, TMATY, Gen. xix. 16, 30; instead of which AAAY, Gen. xxxvi. 6, and AAYY Num. xxxvi. 2, are more usually employed. Such instances of Hebrew usage are perhaps due to the carelessness of the copyists, who from their acquaintance with that language, may have foisted in forms which are undoubtedly opposed to Samaritan usage.

### ADVERB.

17. The adverbs, as well as the prepositions and conjunctions, may perhaps be considered as having been originally substantives in the constructive state. Some of them consist of radical letters alone; as, AVV suddenly; 29v against; where before. Others are formed with serviles; as, AVINTALLITE, or too little; 20092 in order that, etc. It is scarcely worth while, in a rudimentary work like the present, to discuss the senses of the substantives from which these particles are derived. The syntax of the adverb will be found in the Chapter on that subject.

A list of adverbs is subjoined, slightly differing from that given by Cellarius, which will be found exceedingly useful for reference.

ጠኃረጃ nay

' behold, lo.!

ጠዓፕዥ moreover

ጃኞቹ then; also ሉኞቹ

ፕሬፌ already

ሉቫይ like as, Lev. xix. 34.

ጃይይ like as

' be so, also

አር not

ፕር oh that, perchance

ፕፕሬ only

Am2 not, nothing

au2 wherefore (β)

コピ in vain, gratis マピ since ヨピ how 2▽2ピ above コルコピ whence (β) パン now アンム as far as אלע hitherto, moreover

אלע hitherto, more

אלע hitherto, more

אלע suddenly

אלע mittle, too little

אלע much, exceedingly

אלע and אלע now (א)

אלע same as אלע there

The adverb marked (a) is generally used of the *continuation* of time. The final x is omitted with a suffix; as, xyx, Exod. ix. 17.

Those marked  $(\beta)$  are interrogative adverbs. The former is from  $\exists \exists$  and  $\exists$ ; Greek  $\delta \iota \acute{o} \tau \iota$ . The latter is a compound of  $\exists x$  and  $\exists \exists$ , that is from where; Latin unde; Greek,  $\pi \acute{o} \theta \epsilon \nu$ .

The adverb marked ( $\gamma$ ) is the Hebrew 3; it is properly an imperative mood; its plural, 3, is found in Gen. xlv. 4, but the singular form, 3, may be used in a plural sense; as in Exod. xii. 3.

The student is recommended to get this table of adverbs by heart; inasmuch as frequent recurrence to the Lexicon, in the present state of Samaritan lexicography, is not only tedious, but requires more than ordinary skill and perseverance to render it practically useful.

## PREPOSITION.

18. The Prepositions may be divided into two classes, like the Pronouns, viz. Separables and Inseparables or Prefixes. As regards the former class, it is sufficient to

observe that they are generally employed as in the other Shemitic languages.

The following Table of them, formed from that of Cellarius, will be read advantageously, inasmuch as it contains those which are mostly in use:

2/4 at, to
2/m/4 at, to, near
2279 on account of
2/m/3 between

/\*\*729 beside, except
9/\*9 after, behind

m/5/5 on account of (a)

m/5/4 behind, after

/\*\*2/m/2/4 for, in the place of
2/5/9/2 over against; also

with prefix 2.

m/\*2 under, below; with

prefix #

/\*\*72

9/72 also 7/72

within

2/5/2 beyond, afar (\beta)

AF2
TM2
at, to

2279% same as 2279

V92% below, beneath

992% without, from (7)

AMMEN within

'M from, before

TVA as far as

2V upon (8)

MV with,together with

29° against, afar; with

prefix 2, according to, nigh to

MTP before, in the

MTP presence of;

also with the prefixes 2, M

The preposition marked (a) is accompanied by  $2\nabla$ , Gen. xx. 3; it is like the Hebrew y.

That marked  $(\beta)$  is read, in some cases, with  $\Xi$  prefixed. The preposition  $(\gamma)$  is formed by means of a double prefix.  $(\delta)$  also is formed in a similar manner to  $(\gamma)$ ; thus,  $2\nabla 2\Xi$ 

is a pleonasm, with the same force as  $2\nabla$ .

The pronominal suffixes are added to these prepositions in the same way they are added to nouns; thus, myv with me; with from thee; '539119 after them, etc.

19. Some of these prepositions, as in the Hebrew, insert m between themselves and the suffix; as, am2v upon him; am2v upon us; amagy in thy presence; amagy before them, etc.

The two prepositions אַראַ and אָדע, which latter is used for the Hebrew אָל, are found with and without the m inserted; as שׁבְּשׁבּישׁ between thee; שׁבְּשׁבּישׁ between you; אַלאַראַראַנע to you; אַלאַראַראַנע to them, etc.

Generally speaking, the others adopt the common rule, though there are many exceptions.

20. The preposition  $2\nabla$  not only assumes m, but, in addition to it, 7; as, Gen. xxxviii. 13, xlv. 1,  $7m72\nabla$ ; in the latter place, however, the 7 is marked by a small horizontal stroke, signifying that the letter was inadvertently inserted.

For further information respecting the construction of the Prepositions, see the Syntax.

## INSEPARABLE PREPOSITIONS.

21. These consist of single letters, and are joined to nouns, to verbs in the infinitive, and to particles, by *prefixing* them: from which circumstance the name sometimes given to them is derived.

These prepositions are 3, 3, 2, 3, corresponding exactly to the same *prefixes* in Hebrew. It will be observed that the complete forms 33 and  $\Lambda\bar{7}3$  are generally used with the *suffixes*.

The following examples will shew how these prepositions are connected with the suffixes: אַנְאָבָא in you; אַנְאָבָּא in them; אַב to him; אַב to us, etc.; אַבָּא from thee, Gen.

xxx. 2; #A-7# like as thee, Deut. xviii. 18. For further information, see the Syntax.

### CONJUNCTIONS.

22. The following list is from that given by Cellarius:

mr or, either .  $\frac{32\%}{32\%}$  lest (a)12/4 but 72/ unless 23 same as 123 MM2 & if not, unless A=2 because, for  $(\beta)$ because, if, that Mr if 314 also, moreover ਨ੍ਹ because 20139 in order that; also my because; also with the ₩99 but \[ with prefix 2 prefix 9 599 but, only; lest ₩V same as ₩/\$ (Gen. iii. 3.)

The conjunction marked (a) is read with  $\Im \nabla$ ; as,  $\Im \nabla \Im 2\Im$  so as not. That marked  $(\beta)$  is found with  $\Im 2$  in the sense of that not; and with  $\Im 3$  in the sense of but that.

The prefix z and, is also a conjunction; it is not conversive, as in Hebrew.

## GENERAL REMARKS ON THE PARTICLES.

23. We must not omit to mention here the prefix  $\exists$ , which is rarely used in the Samaritan with the force of the Greek article, like the corresponding Hebrew prefix  $\lnot$ , except in some nouns purely Hebrew; as, AMAZAN the God; ANAN the man. It is also employed with the pronouns; as, ANAN he; AMAN she; ANAN these, ANAN they, etc.

The following are instances of its use with the participles;

πνλη ὁ ἐρχόμενος, Εxod. xiv. 19; γλωη ὁ ἀναγαγών, Levit. xi. 45; Ανζη ὁ κατοικών, Deut. i. 44.

24. The use of  $\Im$ , as explained in the previous article, must be carefully distinguished from that in which it is interrogative; as,  $\Im A$  MAA ATVA am I my brother's keeper? Gen. iv. 9; so in Gen. xlv. 3,  $\Im A$  MAY MAA TYVA is my father yet alive? etc. In Deut. xxxii. 6, A is put for  $\Im$ ; as,  $\Im A$  ATI A is not he thy father?

25. The Samaritans do not appear to employ as a suffix like of the Hebrews, expressive of motion or rest. For though avak is sometimes found without the preposition 2, a can scarcely be held to supply its place; because instances occur of vak without a, as in Gen. xii. 5, where ellipses of the preposition 2 are manifest.

## ON THE PERMUTATION OF LETTERS.

26. No letters in the Samaritan language undergo such various permutations as those which are usually, though improperly, called gutturals; viz. ∇, ℜ, Ϡ, Ϡ. The letter ∇ is very frequently written for ℜ; as, Ϡ∇ϘϠϠ for ϠϘϠϠ; ϶ϘϠϠϠ; ϶ϘϠϠϠ, etc.

This letter is also found written for A; as,  $\exists \nabla$  if, for  $\exists A$ ;  $\exists A$  for  $\exists A$  for  $\exists A$ . So  $\exists A$  for  $\exists A$  a mother;  $\exists A$  for  $\exists A$ , etc. On the other hand, A is found for A; as, A for A, etc. The guttural A is found for A; as, A for A. Also for A; as, A A for A.

The guttural a is found for  $\nabla$ ; as, again for  $\nabla$ ga. Also for  $\kappa$ ; as, make for make.

The above are only a few examples of such permutations; numerous others could be produced, but may be safely left

to the student's own observations. Such variations are not easily to be accounted for, except on the principle that "letters of the same organ may be interchanged promiscuously."

27. Other letters are found interchanged, besides the gutturals; as, 9 for ז in אַפָּא, instead of the Hebrew הּיָה he shewed; פּן for זן, etc. Also p for בּ; as, מּצְבּא for מַצְבָא, Gen. xxv. 32.

Similarly, A is found for A, and A for P. Various others are given by Morinus. These are sufficient, however, for our purpose.

- 28. Besides interchanging letters, the Samaritan, like most other languages, is affected by those changes known as metathesis and aphæresis. Thus, may for mva; which for amumy. So are for ap for pav, etc. Instances of aphæresis are 2mp for the complete form 2pu; ma for mam; The for Tha, etc.
- 29. Before concluding, we shall give a few examples of crasis; thus, ₹¼¼ ' ¼¾ behold I, becomes, Gen. xxii. 11, ¾¼¼¾; similarly, ¼¼¼¾ behold ye, Deut. i. 10. This change especially takes place with the particle ¼2 and verbs; as, ¾¼¼¼2, Deut. iii. 26; ¼¼¼¼¼2, Gen. xxxvii. 22, etc. I confess, however, I have some doubt as to the legitimacy of the crasis in the latter case.

# SYNTAX.

## CHAPTER V.

### ON THE NOUNS.

- 1. One substantive depending on another is frequently used by the Samaritans instead of an adjective; thus, ኡ፵፲ ጉላዓሉ ፕሬፌሬ ጉላዓዲኒፕ and his mother took for him an ark of bulrushes, Exod. ii. 3; ፕሬጣፕሬካሌ ተጠህየዓ ጉለጠና and the clothes of service and the garments of holiness, Exod. xxxi. 10; ፕሬሲሬ ተጠህዓና sacrifices of righteousness, Deut. xxxiii. 19.
- 2. A substantive is frequently used, as in the first section, instead of an adjective, to denote the materials of which anything is composed; as, Exod. xxviii. 17, \\(\frac{1}{2}\)Arthermore rows of stone. In this place we may notice the phrase \(\frac{1}{2}\)Mathrappears of days, or two full years, as it is rendered in our version; it must be observed that the governing noun is in the absolute state, and not in the constructive, as is generally the case; the nouns governing and governed must therefore be considered in apposition, the former expressing the whole, the latter parts thereof.
- 3. The cardinal numerals from three to ten inclusive interchange their genders, as in the Hebrew, inasmuch as feminine forms are joined with masculine nouns, and *vice versâ*; thus,

שጠን ነጠሉ ላሉ two years, Gen. xlv. 6; ጓፕኚ ጓሟፕጠ one day, Gen. i. 5, etc., are concordant; but ነጠጎዓ ጓሉ 2ሎ three sons, Gen. vi. 10; ጓህዓባሉ ነ ነጠጎህ four kings, Gen. xiv. 9; שጠን ነመር five years, Gen. xlv. 11; ነ ህጋሙ ጎሎፕዓጋ seven kine, Gen. xli. 18; ጓህሙሉ ነ ይጠኅጋ nine bullocks, Num. xxix. 26; ነጋላሉ ነ ዓጋህ ten she-asses, Gen. xlv. 23, are all discordant in gender, and in number also; the singular numeral being added to a plural noun.

It will appear by the subjoined examples that the cardinals are used in the constructive as well as in the absolute state; as, TMML' two of his wives, Gen. xxxii. 22; IMML' A'LE' eight of oxen, Num. vii. 8; IMLLEE' A'LE' ten of sayings or commandments, Deut. iv. 13, etc.

- 4. The cardinal numerals usually precede their nouns, as our examples will shew; this is, however, by no means always the case, as they sometimes follow; in which situation TH one is always found.
- 5. Those numerals which are multiples of ten are joined to singular and plural nouns; 当は2当1・当は22 thirty camels, Gen. xxxii. 15; スない。当は2 twenty silver pieces, Gen. xxxvii. 28; ヨハ・コニハ2ハ thirty years, Num. iv. 3.
- 6. The composite numerals from ten to one hundred are usually so arranged that the less precedes the greater; as, Gen. xxxii. 22, タネマ・オマス eleven; タネマ・マラット fourteen, Num. xxix. 20, etc. The composite numerals beyond one hundred are free from this restriction, and can either follow or precede; カルマン・メントマ・タネマ・オンジャ three hundred and eighteen, Gen. xiv. 14; カスマ・オステン one hundred and twenty, Deut. xxxiv. 7.
  - 7. The ordinal numerals do not exceed ten in number;

for beyond that number, their place is supplied by the cardinals; as, winday in the fortieth year, Num. xxxiii. 38.

8. The noun substantive is frequently doubled, so as to convey the idea of a whole, comprehending a series of individuals of the same kind; thus, in Lev. xxiv. 15, 'what whosoever curseth his God; that is, every man, without exception.

This repetition of the substantive frequently implies multitude; as, in Gen. xiv. 10, \(\sigma \times \time

The repetition in Gen. xxxii. 16, has a distributive sense; 9TV '9TV'7MT9V'TM9 '9IM7 and he delivered them into the hand of his servants, drove by drove.

9. It has been previously said that one noun dependent on another is frequently used instead of an adjective; there are cases in which the governing noun has the force of an adjective; as, ITA IMP INFAVIATION and as for the flower of his captains he hath drowned it in the Red sea, Exod. xv. 4, rendered "chosen captains" in our version.

The construction just explained is that always followed by 2%, the signification of which, since it is properly a substantive, is 'the whole'; as, TMAG '255 more than all his children, Gen. xxxvii. 3, properly, the whole of his children; MAG '252 we all are sons, Gen. xlii. 11; MATMAV '253 all of my goodness, Exod. xxxiii. 19; BATMAV '253 all thy work, Deut. v. 13. In the two last examples the con-

struction may be inferred from the former ones, where a discrepancy of number exists between 23 and the governed noun.

- 10. By joining a noun with itself in the plural number, a superlative sense is frequently conveyed; as, amuse was holy of holies, Exod. xxvi. 33; amuse was servant of servants, Gen. ix. 25; amaza God of gods, Deut. x. 17.
- 12. When one noun depending on another is used for an adjective, the suffixed pronoun, if there be any, is sometimes added to the governing, at other times to the governed noun; thus, in Lev. xx. 3, muspy when the name of my holiness, instead of way my name of holiness, or, my holy name, as it is usually rendered; muspy any mountain of my holiness, instead of way my mountain of holiness, or, my holy mountain, etc.
  - 13. The adjective, when qualifying a substantive, is

usually put after it; as, AMBABA'AMATAB' MAA' AM two great luminaries, Gen. i. 16. When, however, the adjective is used predicatively, it precedes the substantive; as, 'AMBATO great is my punishment, Gen. iv. 13, AZZBB'AZ the thing is not good, Exod. xviii. 17.

- 14. The Hebrews and Samaritans sometimes use a substantive accompanied by a preposition with the same force as an adjective; thus, Exod. i. 14, \$999'\$9779 work in the field, i. e. 'field-work.'

With מיסק, which is supposed to be of the singular number, compare יִנִי Zech. xi. 17.

- 17. Nouns collective, though in the singular number, are capable of being construed with a plural verb; as, '25 7247' 31794 the whole of the earth came, Gen. xli. 57;

までもつこれがつこれです。 the house of Pharaoh heard, Gen. xlv. 2; similarly, オエマ・2コ・コスラエボボス and the whole of the people shall say, Deut. xxvii. 26.

- 18. On the other hand, a plural noun is found with a singular verb; as, ጎጠዓጠጃኔ ጠጃጠ let there be lights, Gen. i. 14; ጎኳዓ · ፕሬጠላሉ daughters were born, Gen. vi. 1; ጎጠገል · ከላጠ · ፕሬኮሞሉ many troubles have befallen me, Deut. xxxi. 21.
- 19. An adjective of the masculine is sometimes added to a substantive of the feminine; as, amamaw analybeautiful daughters, Gen. vi. 2. So, in Gen. xli. 19, aran mp24. amanav, other hine were ascending, etc.

and all the days were, Gen. v. 23, 31, Gen. ix. 29. In both these examples, the agreement of the predicate with the governed noun must be observed; this does not, however, appear to be the case in Exod. xii. 16, 'A2' ATMAV' 25 ATA "SAVAM all work shall not be done in them.

- 22. When a predicate is added to subjects of different gender or number, it generally agrees with the more worthy; as, 3992 man amount and the wife and children shall be her master's, Exod. xxi. 4; 39m7. 33994 MMAK : MM933 Abraham and Sarah were becoming old, Gen. xviii. 11. The predicate appears to agree with the nearest subject in Gen. viii. 18, 'mm' 77' 31117 777997' 81' PZZT 3019 and Noah went out, and his sons, and his wife, and . the wives of his sons. See Num. xii. 1. This is generally the case when the verb precedes; but when the verb follows, the agreement of the predicate may be inferred from the following examples: '75747' 7M52M7' 3/22'JK'/WTP7 משלי האלני האלני האלני האלני האלני האלני האלני האלני האלני also, and her sons, and bowed themselves; and then Joseph approached, and Rachel, and bowed themselves, Gen. xxxiii. 7; and Memar, and returned, Gen. xxi. 32.
- 23. The Samaritans, like the Hebrews, sometimes use a nominative case absolute, which may be connected with the rest of the sentence in English, by supplying such a phrase as 'as to,' or 'as regards'; 945.23 as to all the gold, Exod. xxxviii. 24; ma. 24. A52m. 482937 and as to his concubine, she herself also bare, Gen. xxii. 24.
- 24. Here also may be noticed the peculiar hypallage, or inversion of words, which is remarkable in the Shemitic languages; as, 38735° 3589 in the blood of purification,

Levit. xii. 4, instead of 'in the purification of blood;' 자기 '사기 ' the copulation of seed, Levit. xxii. 4, instead of 'seed of copulation;' 프때27개발 기술과 silver of shekels, Lev. v. 15, for 'shekels of silver.'

- 25. In all languages more or less *pleonasms* are found to abound. This is especially the case with certain nouns in the Samaritan; as—
- (a) With MIA face; AME: MIA: 2V on the face of the waters, Gen. i. 2; AMME: MIA: 2V'IE from before the face of his dead, Gen. xxiii. 3, instead of 'from the dead body.'
- (角) With 写体 hand; 而我 2 2 5 写体 2 2 from the hand of every living being, Gen. ix. 5; 到 5 by the hand of Moses, Exod. ix. 35, i. e. 'by Moses.'
- (γ) With ৭৯៣৯ a word, tenour; রম্প্র ৭৯ ৭৯ ৭৯ ১২ according to the purport of the lot, Num. xxvi. 56, i.e. 'according to the lot;' রাজ্য এম প্রস্তান্ত ২০ according to the tenour of his speech, Gen. xliii. 7, i.e. 'according to his speech.'

The student will observe others, too numerous to mention here.

## ON THE VERB.

1. The Samaritan language, like the Hebrew, has only two absolute tenses, the perfect and future. To supply the place of the imperfect and pluperfect in other languages, the Samaritan perfect is sometimes used, so that we can only be guided by the context as to the force which must be given to it. Vide the remarks on the moods, § 6, Chap. III.

- ¥2 ' ዓሤሉፕ ' ጓፕዮፓፕ and Isaac called Jacob and blessed him, and charged him, and said to him, Gen. xxviii. 1.
- 2. The perfect is also found in the imperfect sense of 'was,' 'did;' as, ቋጓሙ ፡ ሉፕፌአሉ ፡ ኋና ፡ ቋፌሬ why did Sarah laugh? Gen. xviii. 13; in the sense of 'used to,' 'ሬላጓሙከፕ አፈላጠ ፡ ሉጠ ፡ ቌሤጓ and Israel loved Joseph, Gen. xxxvii. 3; in the sense also of 'began to,' ቋሙኴ ፡ 2∇ ፡ ቋቋ∇ ፡ ኋጓፕ and the people began to murmur against Moses, Exod. xv. 24.
- 3. The perfect is also found in a pluperfect sense in Gen. ii. 5; thus, \$2\$ '\$\forall arm' \n\varphi \forall a' \text{\$\text{\$\text{\$\sigma\_2\$}}\$ for the Lord God had not caused it to rain. Another and more usual method of expressing the pluperfect will be found in the Syntax of the Infinitive.
- 4. Some verbs include, under the perfect form, both a perfect and present sense; such as, ALA he hates and he hated, conveying both the senses of 'odit' and 'odio habuit.' Also, BLA he knows and he knew. Compare the Greek olde and the Latin 'novit,' perfect forms with present senses.
- 5. We sometimes find a future circumstance related in the perfect tense, as something which has actually taken place. The design of the writer in this case was to mark the future occurrence as something already irrevocably decreed and decided upon, and therefore, as it were, accomplished; thus, in Gen. xv. 18, avar. Am Arm 22 to thy sons have I given the land.
- 6. The peculiar use of 7, called *Vau conversive* among the Hebrews, is unknown to the Samaritans, Chaldees, and Syrians; so that the numerous rules founded on this idiom in Hebrew are not applicable to those dialects.
  - 7. The future tense, besides the force of our future, has

various other senses among the Samaritans, examples of which are appended.

- (a) In some cases the future seems to have the force of a present; as, Gen. xxxvii. 15, ሥየዓሉ ነጻଅ what seekest thou? again, Exod. v. 15, ኳጻሄሉ ነዓየላሉ ነጻଅሪ why do you so?
- (B) It is sometimes used to imply possibility, propriety, or necessity, like the perfect in Lev. iv. 2, MGGVAA: A2G which ought not to be done.
- (γ) In the first sense, denoting possibility, it is found in Deut. i. 12, mγτ2·29½ λ. μπλ how can I alone bear you?
- (δ) In the second sense, Gen. xx. 9, ' ΛΜ25' ΞΜΥΞΤ ΣΤΥΞΥΛΜ deeds which ought not to be done.
- (e) In the third sense, Gen. xxiv. 5, 'MM' 'ABV' 'A3BV 39 must I needs restore thy son?
- 8. The future is also used indefinitely to denote that which takes place frequently; thus, in Num. ix. 16, 'ጠጃጠ ' ኃይ ጃጋፈይጠ ' ጃጋጋ⊽ 'ዓጠፍሉ so it was alway, a cloud covered it; again, in Gen. ii. 6, ጃ∇ዓሉ ' ኃይ ' የፈጠ ' ኃጋ⊽ፕ and a mist ascended from the earth.
- 9. Sometimes it implies permission to do anything; as, ቋጠሤ 'ዓፕ∇ሊት ' ጠጋ<sup>™</sup> 'ዓፈጠ let one fetch, I pray you, a little water, Gen. xviii. 4.
- 10. It is used, as was before observed, in forbidding, dissuading, and deprecating, for the imperative; as,  $2\nabla P \wedge A = 1$  thou shalt not kill, Exod. xx. 14; it may also be used in commanding, exhorting, and imploring; thus,  $2\times 2 \wedge 4 = 1$  thus, and shalt swear by his name, Deut. vi. 13;  $2\nabla P = 1$  the shall surely die, Ex. xxi. 15.
- 11. The future is employed also in a general proposition, which always holds good; the following examples will

render this clear; apm ' mm ' an' mm ' 294mg ' 294mg ' as a foster-mother beareth the suchling, Num. xi. 12; and ' and as a man doth bear his son, Deut. i. 31.

- 12. The moods known to us as the Indicative and Subjunctive do not differ among the Samaritans as regards their inflection; they can only be distinguished, therefore, by the context. The two absolute tenses, generally speaking, answer to our Indicative tenses of the same name in direct narration; but in indirect narration, and in conditional clauses, depending upon something previously mentioned, they answer to the Subjunctive.
- 13. The Subjunctive is chiefly designated by the use of certain conditional particles; such as, ይሉ, ይዩ, ይዩ, ይዩ, ይዩ, ይዩ, ይዩ, አልተ if; ፕሬች, ሉጠረፉ unless; ፕሬፕ, ፕሬፕረ lest; ሬጠፕዓኒ that, etc. Thus, ፕሬጠሉጠሉ ሉረ ፡ ይሉ if I should bring him not, Gen. xliii. 9; ሉጋኒጓ ፡ ሉረጓ if thou shouldest lift up, etc., Exod. xx. 25; ፕሬፕሬ ፡ ኔኣ if I should find, Gen. xviii. 26. The particle is also omitted; as, ፕሬፕሬ ፡ አይፕሬ ፡ አይፕሬ
- 14. The condition also on which the subjunctive clause depends is sometimes omitted, and must be supplied from the context; as, ສሉሉሉ "ኳን ነጻቷን የሚሉ ተቋቋኘ ነጻናላል within a little there had lien one of the people with thy wife, Gen. xxvi. 10.

- 16. The Subjunctive mood may also be used when a relative pronoun is accompanied by a verb expressing something indefinite, or depending on a condition not expressed; thus, 32 '93m5'949'23m37, and thou shalt eat of the flesh which he may give thee, Deut. xii. 15.
- 17. To express the Optative mood, the Samaritans adopt the following methods:—They make use of the particle 72, the Hebrew אל would that, joined to either the perfect or future tense; אַמּמּאַלֵּל יִצְלְּאָם יִצְלֵּלְ would that we had died in the land of Egypt! Num. xiv. 2; יווא יִצְלֵּלֵל אַמּתְלֵּלֵל would it may be according to thy words! Gen.xxx.34.
- 18. The Optative mood is also expressed by the formula אַמְרְיַהָּן, the Hebrew מְיִרְיָהָן; as, מִירִיהָן מוֹתָנוּ יַשְּׁרִארָלֵל, as, מִירִיהָן מוֹתְנוּ יַשְּׁרִּארָלֵל, as, מִירִיהָן מוֹתְנוּ would God we had died, Exod. xvi. 3, Hebrew מִירִיהָן מוֹתְנוּ .

  It will be observed that אַמְּאַרְאָה is passive in form, but active in signification.
- 20. The Imperative mood, when enjoining the performance of something, is often joined with another imperative expressive of the result or consequence of the action enjoined; as, 722 3373 purify yourselves, and be clean, Gen. xxxv. 2.
- - 22. The Infinitive mood is placed absolutely without the

- 23. The Infinitive mood is, perhaps, used for the Imperative in some cases. The identity of form, however, which exists between the infinitive and the second person masculine singular of the imperative, in consequence of the absence of vowel points in the Samaritan, exceedingly diminishes the number of such irregularities.
- 24. The participles being verbal adjectives, and having no means of distinguishing by inflexion between any of the tenses except the present and past, may also refer to future time, and serve as gerundives, etc.
- (a) They frequently have a present sense, like those in ens in Latin, and in fact are generally used to express the present definite as well as the imperfect, with or without the substantive verb ጓጓጓ; thus, ፕዓ∇ doing; and also, ነጠጋሉ ፕዓ∇ I am doing; ፕዓ∇ ጓጓጓ he was doing, etc. Vide next section.
- (γ) The participle is used as a gerundive in Lev. xi. 47; 2ይሉሉሉ ሉጊዊ ፕሎጢኒፕ ጎጠዓፕ ጓደይሉሉ አማና ፕሎጢኒፕ ጎጠዓፕ and between the animal that ought to be eaten, and between the animal that shall not be eaten.
- 25. The periphrastic use of the participles and verb substantive for the finite verb is very frequent; thus, for the

- 26. The participles have also frequently a future sense, like those in rus in Latin; thus, ጳ∇ዓሎንኳድንፕደቧዥድ፡ጳፓሎጳጳ and, behold, I am about to destroy them from the earth, Gen. vi. 13; ኌጚ፰ሉጠ 'ኃሎጳጳዴድ'ኌጚጟቋዾሎ ጓጚጓጠኝ which the Lord your God giveth, or, is about to give, you.
- 27. We have previously observed, that the participles have sometimes the force of the Latin gerundive or verbal in bilis; to the instance given above may be added, 'AB AGA AGA MAGA what a dreadful (horribilis) place is this, Gen. xxviii. 17; the instance from Gen. ii. 9, '2B'AM AGABL' PLIV 'IMP every tree pleasant to the sight, is an infinitive, and AGBBL has the force of a supine in u, which is commonly used after adjectives; as, 'arbor delectabilis visu.'
- 28. Though generally the nominative case agrees with the verb in gender and number, there are instances in which this concord is neglected in both cases. We proceed to give examples of such irregularities.
- - (B) The following are instances of discord in number:—

- (γ) Nouns used only in the plural may have a singular verb agreeing with them; as, ጃጠሣ ፡ ጠዓፕν ፡ ጠኋጠ ፡ ሉ2 there shall be no more water, Gen. ix. 15; ሉ2 ፡ ጃፕሬ ፡ ጠሣ ፡ ሉ2ጃ ፕጠ2ν ፡ የጠዓሊ because the water of separation was not sprinkled on him, Num. xix. 13, 20.
- (δ) In the following instance, gender and number are both neglected; as, אוויייתוניקף באלא the congregation, the whole of them, are sanctified, Num. xvi. 3.
- 29. The nominative of a verb is frequently omitted when it can easily be supplied from the context. There is also a frequent ellipsis of the words 22333 a thing, and was a man.
- 30. Verbs in the third person singular, both intransitives and passives, are susceptible of a neuter use; especially such as contain implicitly in their signification the nominative to which they refer; as, MAAMA Gen. xxxi. 35; "MAAMA Let it not be grievous in thy sight, Gen. xxxi. 12. So for the passive; as, PVRAMA: AAMA There it was began to be called on, Gen. iv. 26. I have altered the text given by Walton in the first and last of these examples; in the latter, I have read Aphel in a passive sense, instead of AAM; or we may render with Walton's text, then one began to invoke, etc.; to this, however, the passive infinitive is an objection, unless it be employed in an active sense; Chap. III. § 5. Compare the Latin idiom so often used by Tacitus.

- 31. When a circumstance is related without reference to the agent, the third person singular is employed in an indefinite sense; as, \$77\frac{1}{4}\cdot \text{VPW} \cdot \cdot \cdot 2\) one hath not found a help, Gen. ii. 20; ATW \cdot \cdot 2\mathrm{1} \cdot \cdo
  - 32. There are numerous cases in which the second person is used instead of the third; as, Lev.ii.4, AAAP AAAA and when you shall offer an offering, i.e. when any one shall offer; AVM2 BAVMES as you go to Zoar, Gen. xiii. 10, i. e. as one goes to Zoar; see Exod. xx. passim. Compare Horace, Carm. ii. 3, "Nil interest, an pauper et infimâ de gente sub divo moreris." Also, ii. 18, "Tu secanda marmora locas, etc." Such instances are profusely found in all languages.

  - 34. There is another peculiar use of the finite verb with an infinitive, in which the former may be rendered adverbially; as, ዓዓላይ ነጻፕልጠ ፡ ይሉይይ ፡ ጋላጓፕሎፕ and the angel of the Lord went further, Num. xxii. 26; ጓሉ∇የሥጋሪ · ሉዓላሉ ፡ ኃና ፡ ጓይ what is this thou hast quickly found? Gen. xxvii. 20.
  - 35. The substantive verb, being the copula of a proposition, generally agrees with the *subject* of that proposition,

though it is found agreeing also with the *predicate*; as, in Gen. xxxi. 8, xalk ima ' xmax the speckled shall be thy wages.

- 36. The substantive verb used as a copula is usually expressed in the perfect and future, but omitted in the present and imperfect; as we have previously observed. See § 24.

- 39. It must be observed, that verbs of naming take an accusative case of the name, and a dative formed by the preposition 2, of the thing to which the name is given;

thus, am2m2 'PVA' amm x2x 'mmmx' a9ab2' aa2x 'PVA God called (to) the light day, and (to) the darkness, etc. Gen. i.5.

- 40. The cause or agent is sometimes expressed, after a passive verb, by the sign of the dative case; thus, 'ደጠጓቧ ጓደጠኚጊ' ኳጓጓሉ blessed be Abram by reason of his mighty power, Gen. xiv. 19; ኳፕዴኒ' ፕዓኮሉጠ shall be done by you, Ex. xii. 16.
- 41. To express the verb 'habere' the Samaritans and Hebrews adopt the circumlocution known in Latin as 'est pro habeo'; thus, ጠግሎ 3 ዓመጥ 32 ሉጠሎ ፕሬዚፕ and all that he hath he has given into my hand, Gen. xxxix.8; 'ይጠብጥ 'አሉ ይጠሙኒ' ጠሉ ዓሉ 'ዓ ዓ ገደ, if a man have two wives, Deut. xxi. 15.
- 42. The substantive verb has sometimes the sense of 'to become', followed by the preposition 2; as, in Exod. iv. 9, ይፕሎደ ጓጓጓጎ ጋዴ ስላፕ ጓጠ። ጎንጓጠን and the water which thou takest out of the river shall become blood. Other verbs with a similar notion may follow the same construction.
- 43. The Samaritans, like the Hebrews, studious of brevity, sometimes express, by a single verb, an idea usually conveyed with us by two; as, in Exod. xxxiv. 15 'ኋፕኋላጥ ኋፕጠጓደሉ 'ዓሉዓ they go to fornicate after their gods; ጓጓጓጠ 'ዓሉዓ 'ሉደጃ because he hath completed to follow after the Lord, i. e. hath wholly followed, Deut. i. 36.
- 44. An infinitive clause may stand either as a nominative or accusative to a verb; as, 35772.344. MAY. 95. MM2 it is not good, the man to be alone, Gen. ii. 18, etc.
- 45. The noun denoting the agent or sufferer, which in finite verbs is put in the nominative, with infinitives is in regimen, or in the accusative; as, 3984. ATPLASA. TV until the coming of the morning, Gen. xxxii. 24; 32. 72723 399. PRAMM. AM on bearing to him Isaac his son, Gen.

- xxi. 5; τπ'Σπττ τηττρα 'Ανω in not heeping his commandments, and his judgments; like the Greek ἐν τῷ μὴ τηρεῖν.
- 46. When the inseparable particles  $\mathfrak{Z}$ ,  $\mathfrak{Z}$ ,  $\mathfrak{Z}$ ,  $\mathfrak{Z}$ , are prefixed to the infinitive, the resulting combination answers to the Latin gerund, or the Greek construction of the article with the infinitive. Instances are subjoined of these prepositions with this force.
- (a) With 9; as, ጠ2⊽ዮኳ9 when I killed, Exod. xii. 13; ጠኳፕ2<sup>™</sup>9 when I sent; ኳፕቷጠኋጣኋዓ ሉጠ ፣ ፯⊽ቷ™ኳ9 because he heareth your murmurings, Exod. xvi. 7.
- (β) With এ; as, মুল্লেল 2ব্সমুগ্র at the going down of the sun, Deut. xvi. 6; ব্লুস্ ত on the hearing of Esau, Gen. xxvii. 34.
- (δ) The periphrastic use of the substantive verb, with the infinitive accompanied by 2 for the future, is worthy of notice; as, κωμωμ2 ' 'Σκκπτ that they may be about to execute, Num. viii. 11. Also, in Gen. xv. 12, 'κτκτ 22V2 and the sun was about to set.
- (e) With ቌ; as, ጓሉፕ೭⊽ዮቌ from slaughtering, Gen. xiv. 17; ሉ⊽ጤቌቌ ' 2ኳፕሉ ' ሉ2 fear not to go, Gen. xlvi. 3,

(ξ) This preposition is used to express a cause or the ground upon which an action is performed; as, ' ሉ2 ' ጎፕቷሉጠ' ቋፕቋጠ' ሉፕሧሄጓሧ ' ሉ2ቋ' ቋጠሧሧ∇ ' 2፵፵፱ ' ጎፕቷጠገልሧ ቋሉ∇ፕዓឃ ' ሉጠ' ቋጓ⊽ሧሧፕ not because ye were more in number than all people, but because the Lord loved you, and because he kept the oath, Deut. vii. 7, 8.

47. The construction of the finite verb with its infinitive has been frequently alluded to in the previous part of the Grammar, and examples have been given of it; so that it will suffice to say, that in those cases in which this construction obtains, the student must bear in mind that the infinitive is not redundant, but, with the finite verb, forms a strong asseveration, and increases the force of the latter intensely; as, 257911257 he shall most certainly be put to death, Gen. xxvi. 11; 32.23322 we shall certainly prevail against him.

48. In the construction mentioned in § 47, the species of the infinitive is generally the same as that of the finite verb with which it is connected, as in the first example given in the preceding section; and, even in the second example, a transitive notion is conveyed in the finite verb, for the action implied in prevailing passes on, which, perhaps, may account for the use of 2755 in Pahel. There are cases, however, in which a difference of species seems evident; as, 3777755 we certainly have gone down, Gen. xliv. 26; but here we may suppose the finite verb to have an intensitive

force, which is still further increased by the *infinite*. Vide § 5, Chap. III.

- 49. Participles may follow the construction of the finite verb, so as to govern the following noun immediately, or by the interposition of a preposition; as, 'ሉጠ 'ዓንቷች 'ሉፕጓፕ የዓሉ' 23 and it was encompassing the whole land, Gen. ii. 11; ጋፕረጋረ ' ጋረጋረጛ bearing seed, Gen. i. 29; ' ሥዓጋጛ ቋጛሥጟ ' ጎጠዓና ' ቋጓቋን ' ጎጠዓ dividing light and darkness.
- 50. They may have the construction of nouns in regimine; as, μπος 'Δν' πνη keeping sheep; though, in both cases, it seems preferable to consider πμμη and πνη as nouns, which have much the same force as the Greek construction of the article with the participle; thus, in the above cases, the former is the same as οἱ γινώσκοντες, and the latter as οἱ φυλασσόντες. The latter example may also be explained as in § 15 of the Noun.
- 51. Many participles of intransitive verbs, as well as passive ones, turn the noun, with which they ought to be connected by a preposition, into the genitive case; as, AARMA MARILLA having gone out of the ark, Gen. ix. 10; 9AR AMBUL as captives of the sword, Gen. xxxi. 26; AAR BAA MARILLA to all entering the gate of his city, Gen. xxiii. 10; though, in all these cases, and numerous others, the governing participles may be considered as nouns substantive, an assumption which is supported by their peculiar forms. Compare the forms PADA and ARLV with the substantives ARLA a judge, ARV a homicide, etc.

#### THE PARTICLES.

#### PRONOUN.

- 1. The personal pronouns of the second and third persons, especially the suffixes, are found in the plural masculine referring to nouns in the feminine gender; as, ኳፕኋላላ their flocks; ኳፕኋላላላ drove them away, Exod. ii. 17; ኳፕሬ to them, Exod. i. 21, referring to the midwives.
- 2. A pronominal suffix singular is sometimes referred, in a collective sense, to a plural noun, comprehending a body of individuals; as, ३२३៣ ३५५०००० ट्राप्ट १५००००००० व्यवस्था अधिक delivered him, etc.
- 3. A personal pronoun, when added to the noun to which it refers, is not redundant, but emphatic; as, メデス, Gen. iii. 12; ミンスパン・スス・タマ・コニステン・ンスパン・ンスマ and of the tree of the knowledge of good, etc., thou shalt not eat of it, Gen. ii. 17.
- 4. An inseparable pronoun is sometimes added to a separable one of the same person, to mark with force and emphasis the person to whom it refers; as, Num. xiv. 32, 5378. 53737737 and your dead bodies, you, I say, etc.
- 5. The personal pronoun is used to denote an ellipsis of the verb substantive, especially in the present and imperfect tenses; as, ኔኔፕኔኡ ነጻፕፕ ነዓጋን ነገርድ all of us, the sons of one man are we, Gen. xlii. 11; ሉናኝ ነጠጎሉ I am he, Deut. xxxii. 39. See Castel's Gram. Harmon.

- 7. The demonstrative ነፍ is sometimes coupled with the interrogative ጓኳ2, in which case the former is apparently redundant; as, ጓጓች · ለጓኳሉ · ነፍ · ጓኳ2 wherefore hath Sarah laughed? Gen. xviii. 13; ጠኃሎዒ2ች · ነፍ · ጓኳ2 why hast thou sent me? Exod. v. 22.
- 8. The relative pronoun very frequently includes the noun or antecedent pronoun to which it refers; as, 22345 that which thou shalt say, Exod. iv. 12; 5975 that which he did, etc.
- 9. The relative pronoun is not put in the genitive case; but if this case be required by the construction, it is expressed by a subsequent pronominal suffix; as, 'VIII' AZI'MIT AZI'L the nation which thou shalt not understand as to the language thereof, Deut. xxviii. 49. It can, of course, stand in the accusative; as, MZ'ARY'ARY'ARAK the woman which thou hast brought me, Gen. iii. 12; 'ZAMI'TOVMT XWAK which the man shall do (them), Lev. xviii. 5, where ZAMI is redundant.
- 10. The relative, when it includes the antecedent noun or pronoun, may take a preposition; as, '2v'ጓ፵v'ሉጠ' ሻገ ደ2'ሉ22፵ፕ lead the people to the place which I spake to thee of, Exod. xxxii. 34; ኳፕፕኮሥሉዝ 'ፕሥ 'ኳዓሉ 'ፕዓል get straw from the place which ye can find, Exod. v. 11; ኳኳፕዓሉ2 'ፕሥ of that which was our father's, Gen. xxxi. 1; ኳጓጓሉ2 'ፕሥ of that which is Aaron's, etc.
- 11. When the relative pronoun is preceded by the noun with a preposition to which it refers, this preposition is omitted before the relative; as, ጎኋላሚደጫና ፡ ጃህዓሉደ ፡ ጎኋደህ we came to the land to which thou sentest us, Num. xiii. 27; ጃፕጃጠ ፡ ଅጓጓጓጓ ፡ ጠሉ አመን ፡ 2 አመ from all the nations whence the Lord has scattered thee, Deut. xxx. 3.

- 12. The adverb ጎሤሉ there, with the relative preceding it, has the force of a relative adverb; as, ጓጋጓፕ ጎሤሉፕ where there is gold, Gen. ii. 11; ሤጠጓደሉጓ ጎሤሉፕ where God was; ጎሤሉ ጎጓፕሎፕ where ye are, Exod. xii. 13; ጎሤሉ ሉጓጓፕ where he is, Gen. xxi. 17; ጎሤሉሤ ንዲጎንሉሉፕ whence he was taken, Gen. iii. 23. Vide also, Gen. x. 14, etc.
- 13. The relative pronoun is frequently omitted; as, ቋፕጓጠ ፡ የጋየ ፡ ቌጠንዴፌፌዴ like as the tents which the Lord hath fixed, Num. xxiv. 6; ቋፕጓጠ ፡ 22ዴ ፡ ቌፕጠዓ on the day in which the Lord spake, Deut. iv. 15; ' ኡ2 ፡ ኌጜልኡ ፡ ቋጜጓ ጠ ፡ ቋንዴልኡ and how shall I afflict whom the Lord hath not afflicted (him), Num. xxiii. 8.
- 14. The relative ጎሣ usually refers to persons; it is, however, sometimes used of things which involve the idea of a person; as, ጎጓጓ ጓለጠላሙሤ ፡ 23 ፡ 32 ፡ ጎሣ what to thee is all this drove? Gen. xxxiii. 8. This interrogative is sometimes found in oblique, as well as in direct narration; as, ጓረ⊽ዮ ጎሣ who slew him, Deut. xxi. 1.

Also with the addition of the prefix ץ; as, יאַקּאַץ ישׁטּ מע whoever hath sinned against me, Exod. xxxii. 33. Compare also the corresponding Hebrew יָבי הָּיָטֶר בָּי Syriac בֹ אָלֶין בַּיּ

#### ADVERBS.

1. Adverbs are, for the most part, construed with verbs. They are sometimes placed absolutely, at other times governed by a preposition; as, m572 myself alone, Num. xi. 14;

but, 35722 besides himself alone, Deut. iv. 35; angwery, Gen. iv. 5; angwegenedingly, Gen. xvii. 2; and there, Gen. ii. 12; and thence, Gen. xi. 8.

- 2. Nouns are also used adverbially, either absolutely or when governed by a preposition; as, AMTM to-day, Gen. iv. 14; AMTM this day, Gen. xxv. 31; M2M27 HMMA day and night, Lev. viii. 35; AAMTP first, Gen. xxxviii. 28; AAMTP, Num. x. 13.
- 3. Certain adverbs are also joined to nouns, or separable pronouns, in the same way as to verbs; as, ዓጠዓ<sup>™</sup> ዓ very good, Gen. i. 31; ጎፕጓ ነጻዓሉሉ ነጠሉዓፕኃ ነጻ፵ how dreadful is this place! Gen. xxviii. 17; ፵ጠዓኞ ነጻ፵ how good! Num. xxiv. 5; in the two latter cases ጻ፵ is properly the relative. See Syntax of the Verb, § 27.
- 4. The particle 1/2 is sometimes joined to nouns substantive and adjective, as will appear from the following examples: אַבּאָ יַּאַרַץ and not wise, Deut. xxxii. 6; יַּאַרַץ אַרִּיּיִי יִּאַרַץ at no period of her separation, Lev. xv. 25, Hebrew אָרָלְא יֶּתְרֹיָּרֶוּ יָּגָיְץ; אַרִּיּאַרַץ, by no God, Deut. xxxii. 21. Similarly אַדְּיִי אַרַרָּ . Compare the Greek construction, ή οὐ περιτείχισις, ἡ οὐκ ἀπόδοσις, in Thucydides and Lucian.
- 5. The particle MM2 is similarly used to the Latin 'nihil', 'parum', etc.; thus, MAMA 'MM2 nihil ad servandum, Deut. xxii. 27; HM2 'MM27' HM2 parum panis et parum aquæ, Num. xxi. 5; Gen. xlvii. 13, etc.
- (a) It is also found like ne in 'nemo', and 'nie' in the German 'nie-mand'; as, wight no man; 22ww. Am2 no man; 22ww. Am2 nothing, or it might be rendered, in conformity with the preceding, nihil rei, Gen. xxxi. 50, Exod. v. 11.
- $(\beta)$  It is used to deny a quality predicated by an adjective, and has a *suffix* referring to the subject of the predicate:

- as, AMMUS 'AMMUS which (it) is not clean, Gen. vii. 8; 22°5 '7MMUL' AULVE but the hoof (it) is not dividing, Lev. xi. 4; 7MIL '2PI'VUM' 7MMUL he that hearkeneth not unto the voice of his father, Deut.xxi.18; 25%MUL' 7MMUL' AMUL the bush (it) was not burning, Exod. iii. 2.
- 6. The particle \$29 or \$29 is used, like \$2, with a substantive; as, Deut. iv. 42, with \$\frac{1}{2}33 \text{ with no knowledge;} but in Deut. xix. 4, without a mark, i.e. not knowingly.
- 7. Some adverbs, besides a preposition, take also a pronominal suffix; as, m572'32\* I myself alone; where 572 is for 5732, Syriac , from 2 and 53 one, alone; 3572 it alone, Num. xxiii. 9; m572'23\* A2 I myself am not able alone, Deut. i. 9. Also without prepositions, '34 32" 34m2 if thou thyself art not sending, Exod. viii. 21.
- 9. A negative particle is also construed with the word 25 all, so that the negation is not merely confined to this word, but extends also to the verb; as, '2575' 3252 337' 25' 37' lest finding him every one might be killing him, Gen. iv. 15. The negation is, however, sometimes special; as, Num. xxiii. 13, magar' 42' 3257 but all of it thou shalt not see, i. e. you shall see a part.
- 10. The repetition of the adverb, besides giving the usual intensive force, sometimes denotes a progressive action; as, \$15906 ADMM ADMM I will expel him little by little, Exod. xxiii. 30; 202 · 202 · 202 · 2002 · pan he shall mount above thee higher and higher, Deut. xxviii. 43.
  - 11. Comparative particles are sometimes redundant; as,

- 12. The particle \( \mathbb{\m
- 13. The compound particle \\(\frac{\capsca}{2\capsca}\) 2\(\pi\)\(\frac{\capsca}{2\capsca}\) therefore, differs somewhat from the preceding one, for while the latter marks the relation of two events as that of direct cause and effect, the former generally indicates an event resulting indirectly from a preceding one; thus, \(\frac{\capsca}{2\capsca}\) \(\frac{\capsca}{2\capsca}\) \(\frac{\capsca}{2\capsca}\) and this account shall a man leave, Gen. ii. 24; \(\frac{\capsca}{2\capsca}\) \(\frac{\capsca}{2\c
- 14. Many particles which are included in the *conjunctions* by some, are referred to the *adverbs* by others. On this account, the student will probably find, under conjunctions, particles which, from their force and use, he has led to consider as adverbs, and *vice versâ*.

#### PREPOSITION.

1. The separable prepositions are properly nouns in the constructive state, governing the word before which they are placed in the genitive case; as, \$V\A:2V upon the earth; MANA: UV with my wife; UNMI unto them; MIMI STATES between me and between thee, etc.

- 2. The separable prepositions are also preceded by other separables and inseparables, so as to form words whose signification is compounded of both; as,  $\nabla \nabla \lambda = 10^{-10}$  and  $\nabla \nabla \lambda = 10^{-10}$ , from  $\nabla \nabla \lambda = 10^{-10}$  from  $\Delta = 10^{-10}$ , with a double prefix;  $\Pi \nabla \nabla \Delta = 10^{-10}$ , etc.
- 3. Many prepositions are not immediately connected with the noun they govern, but are followed by other particles, especially the inseparables 2 and אַ; as, אַראַקעבית אַנדער אַידער אַנדער א
- 4. The preposition AM9 between, is construed in the two following ways: the preposition is repeated with both the objects which form the limit of the space implied in AM9; as, ALMA'AM97'A9A'A'AM9 between the light and darkness. In the place of the second AM9, the suffix 2 is read; as, AMB2'AMB'AM9 between the water and water, Gen. i. 6; 939PB2'939PB'AM97 and between contact and contact, Deut. xvii. 8.
- 5. This section contains an account of the principal senses of the *separable* prepositions 9, 3, 2, 3.

The preposition 9,-

- (a) Denotes place; as, and is sometimes employed with substantives, so as to form with them adverbs; as, and deceitfully, Gen. xxxiv. 13.
- ( $\beta$ ) Expresses motion towards; as, 32239 towards heaven, Gen. xi. 4.
- (γ) In the sense of against; as, ₹259 against all, Gen. xvi. 12; ΣΜΥΜΕΘ against Egypt, Exod. xiv. 25.
- (δ) It expresses also the material; as, 'রম্বর্র রর্মণর রুম্প্রের of gold, and of silver, and of brass, Exod. xxxv. 32; also the subject of an action; as, মুন ' মুলালা he shall

eat thereof, Exod. xii. 43, 44; also the manner of an action; as, \( \frac{1}{2} \frac{1}{2} \) with all thy heart, Deut. vi. 5, etc.

- (e) In the sense of for, on account of; as, ALB for money, Deut. ii. 6; AABIJ for his theft, Exod. xxii. 3; AUBIJ on account of five, Gen. xviii. 28.
- (5) With the force of by, through; as, and by Moses, Num. xii. 2; also in the sense of with, denoting the instrument; as, many with my sword, Gen. xlviii. 22; also with, in the sense of together with; as, many with my rod, Gen. xxxii. 10.
- $(\eta)$  It has frequently the senses of when, after that, etc., especially with the infinitive mood. Moreover, this preposition is frequently wanting, and sometimes redundant.
  - 6. The preposition #,—
- (a) Primarily signifies like as, as if; thus, ኋሉጠዓችል according to our likeness, Gen. i. 26. When it is doubled, the former is so, the latter as; thus, ጓጋጠጓይ ፡ ጓዶኋላይ so the righteous as the wicked, Gen. xviii. 25; ጓ∇ጓጋይ ፡ ይሉፕይ so thou as Pharaoh, Gen. xliv. 18.
- (β) In the sense of about, nearly; of number, ኋሎች አውድ about six hundred, Exod. xii. 37; of time, ጓደጓጠየ ኃይላታ about the time of life, Gen. xviii. 10.
- (γ) Like 9, it is used in the sense of when, after that; as, ২০০০ ১৯০৯ and when Esau heard, Gen. xxvii. 34; সংস্থান্থ after he had made an end, Deut. xx. 9.
- (δ) It is deficient in Gen. xlix. 9, AMAA' A7 as a lion's whelp. Sometimes it is redundant, like 9.
  - 7. The preposition 2,—
- (a) Is used in the sense of at, to, or in, expressing motion; as, \$2. \text{MMAT'23} all which there is to him, Gen. xxxix. 8; \$232 to go, Deut. xxix. 18.

- (β) It expresses the essence, condition, or state of a thing; as, ξωπνρ·ωμλι·ξτατ and man was in the state of a living soul, Gen. ii. 7; ξΛΛΑΙ·ΜΙ ΛΤΑΤ and she was to me for a wife, Gen. xx. 12.
- (8) In the senses of according to; as, ATAMATAT2 according to their species:—concerning; as, M2'MAMA say concerning me, Gen. xx. 13:—on account of; as, AT2Y2 on account of their noise, Num. xvi. 34.
- (e) Expressing advantage, in the sense of for; as, ኳፕሬ for them, Exod. xiv. 25; m2 ጓጓጓ had been with me, Gen. xxxi. 42: also in the sense of exchange; as, ጓጔጠኃይ ጓሉጔሉቷ brick for stone, Gen. xi. 3.
- $(\xi)$  The construction of 2 with the infinitive has been previously explained. It is sometimes redundant and deficient.
  - 8. The preposition #,-
- (a) The original force of this preposition, like that of the full form \( \mathbb{H} \), is from; it denotes the cause; as, \( \mathbb{H} \) \( \mathbb{H} \) \( \mathbb{H} \) from the God of thy father, Gen. xlix. 24; here I have read \( 2\mathbb{H} \) \( \mathbb{H} \) \( \math
- (\$) With the sense of on account of, because; as, יאזשאלש אלאטרי אזאוד because God loved you, Deut. vii. 8.
- (γ) In the sense of after; as, בתשמות שות after some days, Gen. iv. 3.
  - (δ) This preposition has other senses, which are, however,

of rare occurrence. Like the rest, it is sometimes deficient and redundant.

#### CONJUNCTIONS.

- 1. The separable conjunctions agree in construction, for the most part, with the adverbs, except that they are always put before sentences, for the purpose of *connecting* them. Some, like nouns and adverbs, are preceded by prepositions; as, 32% vo as not, Deut. iii. 3.

- 4. Sometimes a sentence upon which another depends seems to be wholly omitted; to complete the sense, therefore, and construction, it must be supplied; as, 'ሉጓሤሉ'ሉ2ጃ ይሉሉ'ነጋ' ሉጠ 'ጠጥላሉ' ጓደፕ because I said, I will take care, lest thou take thy daughters, Gen. xxxi. 31, where there is an ellipsis of the Latin 'cavebo'.
- 5. The inseparable conjunction  $\tau$  is variously used in connecting the members of a sentence; it usually has the sense of 'and' or 'also'.
  - (a) It is found in Gen. xii. 12, in the sense of 'but'; as,

TIMENT : MATTING TO THE WILL they will kill me, but thee will they save alive.

- (β) In the sense of 'however', 'since'; as, 'ጓሤይ
  ጠሉጠ 'ኳፕሎጠኳሷ 'ኳፕሎሉፕ 'ጠናጠ2 'ኳፕሎጠሉሉ wherefore
  have you come to me, since ye hate me, Gen. xxvi. 27;
  2∇ዓ ' ሉኳኧሗሤ 'ሉጠጃፕ because she is the possession of a
  master, Gen. xx. 3.
  - $(\gamma)$  It is also found in the sense of 'either', 'therefore'.
- (8) In the sense of 'so that', 'in order that'; as, 'A2 \$\frac{1}{2} \text{A} \text{
- (ε) In the sense of 'when' or 'while'; as, '22∇' ♥₹2₹
  ΥΜ2 when Lot entered Zoar, Gen. xix. 23.
- (炎) The particle  $\tau$  is used in a sentence to which it gives a retributive sense, arising from the expression of a condition or cause in a preceding one; as, 'ጓሉሉ' ከሧጠረሉ' ሉጚጟጟ ነገሤ ከነጋሚ ሉኚ whether because thou art my brother, therefore wilt thou serve me freely, Gen. xxix. 15; 'ጓጚጓጠ' ዓຽጠኚ ጓሤሉጠየ' ሉጠ' ኋረ therefore the Lord will keep for thee the covenant, Deut. vii. 12. Similarly, 'ጓኌሤ' ኌጚጜሪጜጠሤ' ሤጚጠይ ኌጚጜጠጚ ጠረገሉሉኚ in the day of your eating of it, then shall your eyes be opened, Gen. iii. 5.
- (η) The conjunction  $\tau$  is sometimes apparently redundant; as, אַרְאָבְּיִבְּאַ יִּבְיִי אָרְאַרְאַרְיִּרְאָבְיִי יִבְּיִי פּעפּרץ one who eateth bread leavened, that soul shall be cut off, Exod. xii. 15, 19.

There are various other senses, too numerous to mention here.

6. When the conjunction = is repeated, the former

signifies 'either', the latter 'or'; as, mra's \*\* `\$7. \*\* \*\* whether ox or sheep, Deut. xviii. 3. This is similar to the Greek usage of \$\epsilon i\$ and \$\epsilon i\$.

- 7. The particle ኋሎ, when repeated, is used in the sense of 'so'——'as'; thus, ጎኋሎኣዓሉ 'ລሎ 'ኋሎ 'ኋሎ so we, as our fathers, Gen. xlvii. 3.
- 8. Conjunctions expressing doubt are not always found with this force, but are sometimes used to denote the difficulty of accomplishing the object in question, or to bring forward prominently other similar circumstances connected with it; as, lim I AFA. TWE. WELE. ALTW. AFTR. 65W7. ALTMRER ascend unto God, peradventure I shall make an atonement for your sins, Exod. xxxii. 30; Heb. אולי. It is rendered by the LXX., "να ἐξιλάσωμαι. In this case, the peculiar force of the conjunction is well marked by the English "peradventure". "TIMMAWA. "399. 39. "TIGAPA. "AZT and ye shall not touch of it, lest ye be destroyed, Gen. iii. 3, rendered by the LXX., ίνα μη ἀποθάνητε, where the stress lies upon the necessary consequence of their so doing, and conveys no doubt; 3492.m33.325.32.9An let her receive it to herself, lest we may be for contempt, i. e. may be mocked, Gen. xxxviii. 23, which is expressed by the LXX., άλλὰ μή ποτε καταγελασθώμεν. In all these cases, though adverbs of doubt are used, they appear to carry but little of their usual force, but prominently introduce certain points arising from the previous sentence.

#### INTERJECTIONS.

1. The interjections, properly speaking, are placed absolutely in a sentence; that is, do not depend in construction upon any word or words therein.

- 2. As in Latin and Greek, some verbs are used as interjections; thus, Λνπά πλλ άγε, καταβαίνωμεν; or, age, descendamus. So, π2πβω άγε, καταβαίνωμεν; σεν άγε, καταβαίνωμεν; οτ, αξε δίνους τος με δίνους τος δίνους τος δίνους δίνους δίνους τος δίνους δίνους
- 3. Some nouns have the force of interjections when, on account of a vehement affection of the mind, they are abruptly expressed, and are entirely independent of the rest of the sentence; as, MMTAVZ: 2 AR profanum servis tuis! i. e. absit à servis tuis, Gen. xliv. 7.
- 4. Few remarks are required on the Syntax of the Interjection for practical purposes, inasmuch as that part of speech is independent of the rest of the sentence. The force of the Interjections, which may be derived from the Lexicon, is all that is required.

On the Syntax generally it may be observed, that, for the most part, it agrees with the Hebrew and the other Shemitic languages.

### EXTRACTS.

THE following remarks upon the text and construction of some passages in the Extracts will be read with advantage by the student.\*

#### GENESIS, I.

Ver. 2.— מֹצְרְאָרְאָ should probably be read אַלְאָרָא or אַרְאַרָאָרָא ; compare the rendering אָרָלְיָּא in the Targum with the latter. Cellarius explains the form in the text as, "factum κατ' ἀποκοπὴν ex מֹבְיֵבֶ inanitas;" to this conjecture the use of the preceding אַשֵּאָרִיי as an adjective is somewhat opposed.

Ver. 9.—There is an apparent ellipsis of 2 before amuxu. Ver. 11.—ama is for aaa, from aam. The succeeding aam in the text, may be taken as an emphatic infinitive; so we may render, let the earth (fem.) abundantly bring forth herbage sowing (i. e. the earth) seed,† inasmuch as avaau is Pahel or Aphel participle fem., as may be inferred from v. 12, 29.

† That is, by the agency of wind and water, as in the case of the

seeds of the Anastatica Hierochuntica, or Rose of Jericho.

<sup>\*</sup> The author would remind such of his readers as are disposed to be Sebaldi Ravii, that his conjectures are not made in the spirit or on the principles of Houbigant.

Ver. 14.—\mathrm would lead us to expect \mathrm{m2m2} for \mathrm{m2m2}; so in vers. 16, 18.

As regards 737m in this verse, and 737m in the succeeding, both are evidently misread for 577m, as Cellarius would seem to insinuate in a note upon this place; "737m eliso 3 pro 7373m quod per paragogen est pro 573m."

Ver. 16.—I doubt whether m722 should form part of the text; and this doubt is confirmed by the succeeding parallel passage, 39782. Am. 39774, where no such circumlocution occurs, although it appears perfectly antithetical.

Ver. 17.—ጓሉጓ፰ may be Aphel for ጓሉጓጠኌ, from ዓፕሉ; or, by metathesis, for ጓጓሉኴ, regularly ጓግጠኌ, Pahel. The latter supposition receives confirmation from ▼2™ኌ in the succeeding verse.

Ver. 20.—3772 may be an *emphatic* infinitive after 27372/mm, as well as a substantive. The former supposition is perhaps preferable.

Ver. 26.—אַבְּמוֹשֵלֵץ is somewhat anomalous; probably imitated from the Hebrew participle רֹמֵשׁ or רֹמָשׁ , the Tsere

being represented by m. Should it be read AAmus Pehil? Vide also ver. 30.

Ver. 28.—All the versions tend to render the reading מהאמשט suspicious. Should it be אַאַמשט, as in ver. 24, 25, etc.? The compound אַאַמשט, immediately succeeding answers to the Hebrew הָּהְטָּשְׁה, whence it is probably derived. Here again, I apprehend, the true reading may be obtained by expelling , when we may render, which hath crept, Pahel; at least, such an elision would produce a form consistent with the general principles of the language.

### EXODUS, XX.

Ver. 5.—שתראחופת ' 2עז ישראארוופת ' 2עז is literally rendered from the Hebrew. Of course there is an ellipsis of a substantive, and in all probability this substantive is שמושפ in the extended sense of descendants; hence we may render, visiting the sin of fathers upon the immediate descendants (i. e. children and grand-children), and upon the third and fourth descendants (generations). In the Targum we have, על-דֶרַרְתַּלְיִתֵּי וְעַלְּרַרְרַנִיעָי.

Ver. 10.—Upon the hiatus after ガルスス Cellarius remarks, "hiatus arguit vocem ガルスラ jumentum tuum, quam codex Ebræo-Sam. habet; in versione autem non apparet."

Ver. 11.—The reading Aum for AAu is to be remarked. Ver. 16.—TMAA is apocopated for the full form TMAAA Pahel, from TAA.

Ver. 17.—The latter parts of this verse is interpolated from Deut. xxvii. 2, etc.; xi. 30. • The apocopate ama for amam should also be noted.

I have retained ANTHAM in the text, in deference to the opinion of Castel, who says, "ANTHAM idem quod nin," although I am convinced we ought to read ANTHAM instead.

Ver. 19.—This verse is chiefly derived from Deut. v. 24—27. In it my for my must be observed; as also mover. Aphel imperative, formed regularly like the Chaldee from move, the vowel *Tsere* being represented by the mater lection is m.

Ver. 20.—In the phrase ATTA'S' 2MT92, the infinitive is governed by the ellipsis of 2, or by the 2 in the adverb.

Ver. 22.—This verse is interpolated from Deut. v. 28, xviii. 18, and succeeding verses. Perhaps 39vm3 should be read 39vm3.

As regards the expression max 9am/mm maz, something is clearly wrong. It perhaps should be either maxz, as in Gen. xxx. 34, or max 9am/mm; the latter is preferable. The reading in the text is evidently a compound of the two conjectures just given; for, maz is for maxz or maxz. The latter conjecture may even be an incorporated gloss on the former, or vice versâ.

Some little difficulty attaches to the word antime in the latter part of the verse. I propose to derive it from Mam to bear, to attend, the compound Mam being found in Gen. xlii. 23, in the sense of interpreter. If this be the case, we ought to read and me as a participle, and render, I will tell all that pertaineth to the decrees and judgments, etc. I have simply rendered it by "precepts" in the Lexicon.

Ver. 25.—27mm I is perhaps Pehil with a suffix; so that we may render, thou shalt not build them (fem.), having hewn them (masc.); i. e. thou shalt not build them of hewn,

etc. The word may also be an infinitive, with the omission of the prefix  $\mathfrak{Z}$ ; in this case, render, after hewing them. The discrepancy in gender between  $\mathfrak{Z}\mathfrak{M}$  and  $\mathfrak{Z}\mathfrak{Z}$  should be noted.

### DEUTERONOMY, XXXIV.

Ver. 1.—The student will see that the greater part of the first and the two succeeding verses of the Hebrew, probably containing a complete account of the extent of the panorama exhibited by God to Moses, are rendered in the version by a vague expression of the limits of Moses' observation, without specifying the individual occupants between those limits.

The proper reading of the should be them, as in Num. xxii. 1, xxvi. 3, 63, etc.

Ver. 6.—After AAP, the suffix AA is manifestly omitted. Ver. 8.—Upon the somewhat confused phrase 'AAT'MAA \*\*\* Cellarius remarks, "forte quod dedecus, neminem a morte eximi; vel fletus nimius, quod indecorum dolori indulgere." I have doubts about the genuineness of this passage, which it would be superfluous to give here.
